this collection provides an excellent introduction to three of the most important names in twentieth century spanish  
philosophy miguel de unamuno 1864 1936 josé ortega y gasset 1883 1955 and josé ferrater mora 1912 1991 the thought  
provoking work of these great contemporary philosophers offers a rich and penetrating insight into human existence  
originally written by ferrater mora in the middle of the last century his interpretations of unamuno and ortega are  
considered classics and the chapter on his own thought reflects his mature thinking about being and death each essay is  
introduced by noted ferrater mora scholar j m terricabras and contains updated biographical and bibliographic information

this volume grew out of the experience of the first inter american congress on philosophy of technology october 1988  
organized by the center for the philosophy and history of science and technology of the university of puerto rico in  
mayagüez the spanish language proceedings of that conference have been published in carl mitcham and margarita m peña

borrero with elena lugo and james ward eds *el nuevo mundo de la filosofía y la tecnología* a university park pa sts press 1990 this volume contains thirty two papers twenty two summaries an introduction and biographical notes to provide a full record of that seminal gathering discussions with paul t durbin and others including many who participated in the second inter american congress on philosophy of technology university of puerto rico in mayagüez march 1999 raised the prospect of an english language proceedings in the philosophy and technology series but after due consideration it was agreed that a more general volume was needed to introduce english speaking readers to a growing body of literature on the philosophy of technology in the spanish speaking world as such the present volume includes spanish as well as latin american authors historical and contemporary figures some who did and many who did not participate in the first and second inter american congresses

this volume has 41 chapters written to honor the 100th birthday of mario bunge it celebrates the work of this influential argentine canadian physicist and philosopher contributions show the value of bunge s science informed philosophy and his systematic approach to philosophical problems the chapters explore the exceptionally wide spectrum of bunge s contributions to metaphysics methodology and philosophy of science philosophy of mathematics philosophy of physics philosophy of psychology philosophy of social science philosophy of biology philosophy of technology moral philosophy social and political philosophy medical philosophy and education the contributors include scholars from 16 countries bunge combines ontological realism with epistemological fallibilism he believes that science provides the best and most warranted knowledge of the natural and social world and that such knowledge is the only sound basis for moral decision making and social and political reform bunge argues for the unity of knowledge in his eyes science and philosophy constitute a fruitful and necessary partnership readers will discover the wisdom of this approach and will gain insight into the utility of cross disciplinary scholarship this anthology will appeal to researchers students and teachers in philosophy of science social science and liberal education programmes 1 introduction section i an academic vocation 3 chapters section ii philosophy 12 chapters section iii physics and philosophy of physics 4 chapters section iv cognitive science and philosophy of mind 2 chapters section v sociology and social theory 4 chapters section vi ethics and political philosophy 3 chapters section vii biology and philosophy of biology 3 chapters section viii mathematics 3 chapters section ix education 2 chapters section x varia 3 chapters section xi bibliography

the first volume of essays in english on one of the most renowned contemporary italian philosophers remo bodei 1938 2019 was one of italy s most influential philosophers of the past half century his intellectual influence was wide reaching as he guided the search for rational explanations of seemingly irrational phenomena and the philosophical underpinnings of poetry diverse both in their disciplinary approach and theoretical style yet following a logical and coherent progression the essays within geometries of experience begin with an exploration of bodei s methodology followed by an analysis of his interest in the crisis of subjectivity in modern culture his engagement with spinoza especially in his work *geometria delle passioni* his treatment of the body framed as a materialistic spirituality and his engagement with the relationship between philosophy and poetry overall the book provides a rich and nuanced view of bodei s intellectual legacy demonstrating his

distinctive approach to philosophy and literature

this book offers the most complete and up to date overview of the philosophical work of evandro agazzi presently the most important italian philosopher of science and one of the most influential in the world scholars from seven countries explore his contributions in areas ranging from philosophy of physics and general philosophy of science to bioethics philosophy of mathematics and logic epistemology of the social sciences and history of science philosophy of language and artificial intelligence education and anthropology metaphysics and philosophy of religion agazzi developed a complete and coherent philosophical system anticipating some of the turns in the philosophy of science after the crisis of logical empiricism and exerting an equal influence on continental hermeneutic philosophy his work is characterized by an original synthesis of contemporary analytic philosophy phenomenology and classical philosophy including the scholastic tradition and these threads are reflected in the different backgrounds of the contributors to this book while upholding the epistemological value of science against scepticism and relativism agazzi eschews scientism by stressing the equal importance of non scientific forms of thought such as metaphysics and religion while defending the freedom of research as a cognitive enterprise he argues that as a human and social practice it must nonetheless respect ethical constraints

scientists historians philosophers and theologians often engage in debates on the limitations and mutual interactions of their respective fields of study serious discussions are often overshadowed by the mass produced popular and semi popular literature on science and religion as well as by the political agendas of many of the actors in these debates for some reducing religion and science to forms of social discourse is a possible way out from epistemological overlapping between them yet is there room for religious faith only when science dissolves into one form of social discourse the religion thus rescued would have neither rational legitimisation nor metaphysical validity but if both scientific and religious theories try to make absolute claims on all possible aspects of reality then conflict between them seems almost inevitable in this book leading authors in the field of science and religion including william carroll steve fuller karl giberson and roger trigg highlight the oft neglected and profound philosophical foundations that underlie some of the most frequent questions at the boundary between science and religion the reality of knowledge and the notions of creation life and design in tune with mariano artigas s work the authors emphasise that these are neither religious nor scientific but serious philosophical questions

includes entries for maps and atlases

through a close examination of philosopher leopoldo zea s historicist phenomenology mario sáenz offers fresh insights into the role of mexican intellectuals in the creation of a latin american philosophy of liberation while this philosophy of liberation has been widely recognized as the most intellectual political ideology to emerge from latin america this century few scholars have specifically explored the mexican roots of this movement sáenz redresses this imbalance by placing zea and his contemporary intellectuals firmly within the context of post revolutionary mexico a political and social landscape

that fostered criticisms of colonial and neo colonial structures of dependence Sáenz demonstrates how Zea's philosophy was informed by a sense of Mexico's distinctive social and cultural identity
