designed for undergraduate courses emphasizing human anatomy and using the cat for dissection this popular manual organized by system offers exercises that highlight the differences and similarities between feline and human anatomy

excerpt from a laboratory manual of human anatomy many instructors in anatomy have for some time felt the need of more systematic more orderly and more thorough work in the dissecting room anatomy one of the first sciences to be taught by the laboratory method has not always kept pace with her younger sister sciences in the advance of methods of instruction a number of laboratory manuals are it is true available but it has been complained that even the best of these is unsatisfactory partly on account of nomenclature partly because so much is included that the student tends to lean entirely upon his manual rather than to observe at first hand for himself and to consult larger text books and atlases so convinced have some anatomists become of the inadequacy of present manuals that they have banished all dissecting guides from their laboratories and insisted upon their students working with no guide whatever except large atlases and text books and occasional hints from the instructor this latter plan has worked very well in some instances especially where men entering upon the study of

medicine had previously undergone rigid laboratory training in physics chemistry and biology but even such men had to pass through a period of doubt perplexity and discouragement before they became independent dissectors and some of them completely failed to do so students without such preliminary training in science are very apt to be utterly lost if thrown entirely or almost entirely upon their own resources especially where classes are large and more than ten students have to be cared for by one instructor it is believed that the use of the laboratory manual here presented will enable the good student to become an independent worker much more quickly than when he is left without such guidance he will be able to do his work in less time and can assure himself that he is doing it thoroughly using the manual if he prefer merely as a control of his work at the same time the student who is less well equipped will be gradually led into independent work to which he might otherwise never attain about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at [forgottenbooks.com](http://forgottenbooks.com) this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
