this book is not only the attempt at the reconstruction of the military expedition of the army of alexander the great in bactria and india and an analysis of the historical sources on which our modern image of alexander s age is based but also aims at reconstructing the imago mundi that the ancient greeks and macedonians had on the world they conquered the birth and development of alexander s myth are also treated in these pages

the volume collects the most important papers pierluigi donini wrote in the last three decades with the aim of promoting a better assessment of post hellenistic philosophy the philosophical relevance of post hellenistic philosophy is now widely though not yet universally recognized yet much remains to be done the common practice of focusing each single school in itself detracts from a balanced assessment of the strategies exploited by many philosophers of the period on the assumption that debates among schools play a major role in the philosophy of the commentators donini concentrates on the interaction between leading aristotelians and platonists and demonstrates that the developments of both systems of thought were heavily influenced by a continuous confrontation between the two schools and whereas in cases such as alcinous and aspasius this is basically uncontroversial for other authors such as alexander antiochus and plutarch the pioneering work of donini paves the way for a better understanding of their doctrines and definitely confirms the intellectual importance of the first imperial age when the foundations were laid of versions of both aristotelianism and platonism which were bound to influence the whole history of european thought from late antiquity onwards

this volume presents the papers of an interdisciplinary conference held in wroclaw in 2011 dedicated to alexander s expedition to egypt as well as to his afterlife and legend tied to egypt and alexandria regarding military aspects there are papers focusing on egypt s strategic significance in 4th century greek sources as well as on alexander s conquest in comparison to earlier conquests of the land of the Nile furthermore they re-examine the chronology of alexander s stay in

egypt and discuss the founding of alexandria e g by linking it with 4th century urban developments in the eastern mediterranean since alexander s policy in egypt is in large part reflected by hieroglyphic inscriptions and papyri other contributions focus on his legitimation as a pharaoh his royal title as well as on egyptian temples renovated on his order alexander s expedition to egypt and the east was also a powerful stimulus for the development of science in antiquity which is covered by papers on the mystery of the flooding of the nile and the spread of astrology his afterlife and legend is presented in this volume by a nuanced position of alexander in ptolemaic ideology and art while further papers scrutinize and dismantle modern scholarly myths of alexander s sarcophagus and his tomb in alexandria methodological approaches from different fields of scholarship such as ancient history classical studies egyptology and archaeology are juxtaposed in this volume and may contribute not merely to the study of the egyptian episode in the history of alexander the great

why prisoners of the gorgons because in the oxford painting the gorgons are shown in evident fashion and two eminent critics condisered the leading ones in the art world making use of their erroneous allegorical interpretation have conditioned and altered the true reading of the painting imposing their anti catholic sentiments on over 150 art historians who have directly or indirectly dealt with this work by rubens
