this work investigates the close relationship between language and culture it explains key concepts such as social context and cultural authenticity using insights from fields which includes linguistics sociology and anthropology

this book takes cultural knowledge in language learning not only as a necessary aspect of communicative competence but as an educational objective in its own right if the aim of foreign language education is to foster cross cultural awareness and self realization language pedagogy needs to come to grips with a range of fundamental issues what do we mean by cultural context can discourse practices be taught like rules of grammar what role does literature play in the development of second language literacy how can learners acquire both an insider s and an outsider s understanding of the foreign culture as expressed through its language by exploring these and other issues the book can help language teachers reflect on their profession and place it within its larger societal and educational context in turn they can help learners become not only skilful users of the language but also active architects of a new cross cultural world order

the book presents a new theory of the relationship between language and culture in a transnational and global perspective the fundamental view is that languages spread across cultures and cultures spread across languages or in other words that linguistic and cultural practices flow through social networks in the world along partially different paths and across national structures and communities

looks at the teaching of language and culture in a globalized world

winner of the 2015 16 kenneth w mildenberger prize awarded by the modern language association many educators aim to engage students in deeply meaningful learning in the language classroom often facing challenges to connect the students with the culture of the language they are learning this book aims to demonstrate that substantial intercultural learning can and does occur in the modern language classroom and explores the features of the classroom that support meaningful culture in language learning the author argues that transformative modern language education is intimately tied to a view of language learning as an engagement in meaning making activity or semiotic practice the empirical evidence presented is analyzed and then linked to both the theorizing of culture in language teaching and to practical concerns of teaching

language teachers are key figures in preparing young people for participation in an increasingly multilingual and culturally diverse world yet little is known about how they go about this in practice this book uses examples of classroom interaction to reveal how teachers of languages act as intercultural mediators and the implications of this for practice to date there has been little exploration of how teachers mediate language and culture learning from an intercultural perspective and what underlies their mediation practices in terms of their conceptions of intercultural language teaching and learning this book offers an account of what teachers are thinking feeling and doing as they enact an intercultural perspective on language teaching and learning
