paperback studies in the comoro archipelago form part of a larger project to
assess the status and distributions of sea turtles in the western indian ocean
an ambitious venture that still continues the comoro archipelago has been
little studied and the sea turtles there have been virtually ignored by biologists
none the less there are relatively large numbers of turtles nesting in these
islands and the adjoining shallow water areas with some of the richest reefs in
the western indian ocean may provide important feeding habitats for many
turtles this illustrated report is the first detailed account of marine turtles in the
comores based on merely four month s observations it is but a preliminary
statement but because follow up studies are likely to be few there have been

none in over a decade the results are presented in detail to facilitate future comparative studies
