the volume collects the most important papers pierluigi donini wrote in the last three decades with the aim of promoting a better assessment of post-hellenistic philosophy the philosophical relevance of

post hellenistic philosophy is now widely though not yet universally recognized yet much remains to be done the common practice of focusing each single school in itself detracts from a balanced assessment of the strategies exploited by many philosophers of the period on the assumption that debates among schools play a major role in the philosophy of the commentators donini concentrates on the interaction between leading aristotelians and platonists and demonstrates that the developments of both systems of thought were heavily influenced by a continuous confrontation between the two schools and whereas in cases such as alcinous and aspasius this is basically uncontroversial for other authors such as alexander antiochus and plutarch the pioneering work of donini paves the way for a better understanding of their doctrines and definitely confirms the intellectual importance of the first imperial age when the foundations were laid of versions of both aristotelianism and platonism which were bound to influence the whole history of european thought from late antiquity onwards

a journey through the periods which italian photography has experienced during the xx century in a truly extraordinary variety of languages ranging from the nineteenth century realistic approach to the experimentations of the avant gardes from the mellowness of pictorialism to modernism from the formal and social novelties of the post war period to the golden age of the reportage from the conceptual commitment of the 1970 s to the landscape school of the 1980 s up until the neo conceptual tendencies
