organized by continent offers a catalog of an exhibition highlighting the works of one of the  
pioneers of modern architecture

drawing on the author's discovery of an unknown long forgotten collection of photographs in an Indian ashram this book offers an exciting new view of the international community of young architects who served as Le Corbusier's assistants in the inter war years a collection of some 500 snapshots assembled by the Czech architect František Sammer between 1931 and 1939 had been stored unnoticed for more than 70 years in an unlikely location the Sri Aurobindo Ashram in Pondicherry India Sammer was one of Le Corbusier's closest assistants from the early 1930s later Sammer worked in the Soviet Union Japan and India during and after his time in Paris he personally took or collected these photographs which he then deposited at the Ashram when he left to fight in World War II the images offer a remarkable view of the international community of people who worked in Le Corbusier's atelier in the 1930s among those featured in the photographs are Charlotte Perriand Pierre Jeanneret Jane West the first American woman to work for Le Corbusier Gordon Stephenson Antonin Raymond Junzo Sakakura and Josep Lluís Sert given the travels and international background of these individuals the photographs are from different countries around the world including the USSR England France Czech Republic Greece USA Tennessee Montana California and New Mexico Japan and India the Le Corbusier Galaxy successfully brings together serious archival research with a fascinating narrative and it captures the human dimension of modern architecture which is all too often neglected in today's accounts

this book considers the architect Le Corbusier's encounters with Australia and New Zealand as a two way exchange showing the impact of his ideas and projects on architects of the region whilst also revealing counterinfluences on Le Corbusier in his post war career that were activated by his contacts compiled from detailed archival research undertaken at the Fondation Le Corbusier Paris and nationally based archives Le Corbusier in the Antipodes brings together a set of episodes placing them in context with the history of modern art architecture and urbanism in 20th century Australia and New Zealand key exchanges between Le Corbusier and others never before described are presented and analyzed including Le Corbusier's contact with Australian architect Harry Seidler at Chandigarh Le Corbusier's drawing of the plan of Adelaide in 1950 and his creative collaboration with Jørn Utzon on art for the Sydney Opera House this book also includes analysis of previously unseen Le Corbusier artworks which formed part of the Utzon family collection in reading these personal and contingent moments of encounter the book puts forward new ways of understanding the dissemination and mediation of Le Corbusier's ideas and their

effects in post war australia and new zealand these antipodean contacts are set against the broader story of le corbusier s career questioning received interpretations of his design methods and current assumptions about the influence of his work in national contexts beyond europe

the millowners association building in ahmedabad designed by le corbusier and completed in 1954 has rarely been published but is nevertheless considered an important milestone in the architect s work in particular the building influenced his later work such as the carpenter center for the visual arts at harvard this book documents the building and relates it to le corbusier s theoretical work especially *vers une architecture* the significance of key figures such as paul valéry and john ruskin for le corbusier s work is explained characteristic design elements such as the promenade architecturale and the use of brise soleils are explored in addition to numerous scaled drawings newly produced models clarify the most important design aspects of the building le corbusier s 1954 building for the millowners association in ahmedabad is an understudied key work with attractive photographs new drawings and models created especially for the publication the structure exemplifies characteristic elements of le corbusier s work and his development as an architect

what is the relevance of the chandigarh experiment today written by an esteemed scholar and former resident of the city this fascinating book reevaluates le corbusier s work in chandigarh in terms of the pressing challenges of the present in particular climate change globalization neo nationalism and information technology through a lively poststructuralist and postcolonial framework this book explores issues of preservation identity meaning and change comparing how the chandigarh we see today compares to the original plans and drawings but this book also asks whether chandigarh s aesthetics as well as the ethical tenets on which it was based are still relevant to urban planning and architecture today what lessons if any does the utopian ethos within modernism offer in the face of the climate crisis rising authoritarianism and the digital explosion via chapters focused on the hydrologics of the master plan the symbolism of the capitol buildings and the archeology of the unbuilt museum of knowledge this book makes the future preservation case for chandigarh as an open work a project that was set up by design to be completed by others in times yet to come engaging and erudite throughout this book will appeal to any student scholar or professional with an interest in architecture landscape architecture and

urban planning

this project is born out of similar questions and discussions on the topic of organicism emergent from two critical strands regarding the discourse of organic self generation one dealing with the problem of stopping in the design processes in history and the other with the organic legacy of style in the nineteenth century as a preeminent form of aesthetic ideology the epistemologies of self generation outlined by enlightenment and critical philosophy provided the model for the discursive formations of modern urban planning and architecture the form of the organism was thought to calibrate modernism's infinite extension the architectural organicism of today does not take on the language of the biological sciences as they did in the nineteenth and twentieth centuries but rather the image of complex systems be they computational informational geo ecological or even ontological aesthetic networks what is retained from the modernity of yesterday is the ideology of endless self generation revisiting such a topic feels relevant now in a time when the idea of endless generation is rendered more suspect than ever amid an ever increasing speed and complexity of artificial intelligence ai networks the essays collected in this book offer a variety of critiques of the modernist idea of endless growth in the fields of architecture literature philosophy and the history of science they range in scope from theoretical and speculative to analytic and critical and from studies of the history of modernity to reflections of our contemporary world far from advocating a return to the romantic forms of nineteenth century naturphilosophie this project focuses on probing organicism for new forms of critique and emergent subjectivities in a contemporary post pandemic constellation of neo naturalism in design climate change complex systems and information networks this book will be of interest to a broad range of researchers and professionals in architecture and art history historians of science visual artists and scholars in the humanities more generally

three cultural ecologies reverses common conceptions of modern architecture it reveals how selected works of two modern architects le corbusier and frank lloyd wright embraced environmental and cultural conditions as reciprocal and complementary a basic premise of this book's arguments is that cultural patterns cannot be adequately conceptualized in the terms that typically define ecology today instead studies based on the natural sciences must be complemented by descriptions and interpretations of historical narratives cultural norms and individual

expressions previously unpublished images and new interpretations will allow readers to rediscover works they thought they knew villa savoye taliesin la tourette and ocatilla as well as projects that are less well known by wright the house on the mesa and the city residential plan and by le corbusier the immeuble villas and îlot insalubre projects more broadly this study of cultural ecology at three scales domestic monastic and urban reconsiders the history of modern architecture the conditions brought about by societal and technological modernization and confronted by modern architecture have not disappeared in our time but have intensified making the task of imagining how some measure of equilibrium between culture and ecology might be achieved even more pressing

while le corbusier s urban projects are generally considered confrontational in their relationship to the traditional urban fabric his proposal for the venice hospital project remained an exercise in preserving the medieval fabric of the city of venice through a systemic replication of its urban tissue this book offers a detailed study of le corbusier s venice hospital project as a plausible built entity in addition it analyses it in the light of its supposed affinity with the medieval urban configuration of the city of venice no formal attempt to date has been made to critically analyse the hospital project s design considerations in comparison to the medieval urban configuration of the city of venice using a range of methodologies including those from architectural theory and history using archival resources on site analysis and interviews with important resource persons this book is an interpretation of the conceptual basis for le corbusier understanding of the structural formulation of the city of venice as mentioned in the radiant city 1935 in doing so it deciphers the diagrammatic analysis of the city structure found in this work into a set of coherent design modules that were applied in the hospital project and that could become a point of further investigation architects and other architecturally interested laypeople with an interest in venice will find the book a valuable addition to their knowledge for architectural historians the book makes an important link between modernism and the historically grown venice

long live the modern celebrates new zealand's heritage of modern architecture it is not a history of modern architecture in that country rather it identifies 180 key modern buildings that survive and maintain their original design integrity

montage has been hailed as one of the key structural principles of modernity yet its importance to the history of modern thought about cities and their architecture has never been adequately explored in this groundbreaking new work martino stierli charts the history of montage in late 19th century urban and architectural contexts its application by the early 20th century avant gardes and its eventual appropriation in the postmodern period with chapters focusing on photomontage the film theories of sergei eisenstein mies van der rohe's spatial experiments and rem koolhaas's use of literary montage in his seminal manifesto delirious new york 1978 stierli demonstrates the centrality of montage in modern explorations of space and in conceiving and representing the contemporary city beautifully illustrated this interdisciplinary book looks at architecture photography film literature and visual culture featuring works by artists and architects including mies koolhaas paul citroen george grosz hannah höch el lissitzky and le corbusier

alice friedman argues that the aesthetics of mid 20th century modern architecture reflect an increasing fascination with glamour a term used in those years to characterise objects people experiences as luxurious expressive even magical

this book documents two complementary urban realities that have played a fundamental role in the imagination definition and redefinition of the twentieth century modern city shifting away from

an understanding of architecture as the construction of monumental masterpieces the texts collected here assemble the narratives behind the public spaces housing and social facilities in these two cities where modern plans have proven unexpectedly resilient and adaptable over time this perspective is reinforced through visual contributions by yto barrada and takashi homma two photographers especially invested in capturing everyday urban life in a world marked by decolonization and cold war politics casablanca and chandigarh appear simultaneously as exponents of and countercurrents to modernization and its development perspectives the book's three chapters set the context for reading casablanca and chandigarh as the results of nuanced dynamic processes of international exchange driven by the engagement and expertise of a new class of design professionals as a dossier of actors alignments and agendas the book contributes to an alternative historiography of post war urbanism and to recent reflections on the impact of transnational practice p 4 of cover

the book is about le corbusier and pierre jeanneret the swiss french architects an attempt to cover the entire indian works of the 2 architects deals with their own works and their influence in indian architecture covers approximately 50 projects designed by them along with almost 40 works of indian architects which shows the influence of their philosophy 8 chapters tale of two colossi city planningcitadels of democracy poetry of homes hives of work temples of learning corridors of culture footprints epilogue notes bibliography glossary index many illustrations in b w
