essais sur l'art de la photographie

la photographie n'existe pas seulement sous la forme d'images rangées dans les albums familiaux ou présentées dans les expositions elle est d'abord une pratique qui se passe d'images certaines photographies familiales ne sont jamais développées et la plupart sont à peine regardées plus d'une fois partant de ce constat l'auteur s'intéresse ici aux gestes du photographe professionnel ou amateur regarder à travers un viseur appuyer sur le bouton développer une image la découvrir la commenter sont autant de façons de nous approprier nos diverses expériences du monde sur ce chemin serge tisseron est conduit à remettre en cause quelques lieux communs qui depuis roland barthes sont souvent repris en consensus non la photographie n'est pas seulement nostalgie du passé elle est toujours partagée entre deux désirs opposés et complémentaires l'un vise à arrêter le défilement du temps et à figer la représentation l'autre anticipe et accompagne le mouvement du monde le premier est mélancolie le second est bonheur

memory has always been crucial to french literature and culture as a means of mediating the relationship between perception and knowledge of the individual coming to terms with his identity in time relatively recently memory has also emerged as the key force in the creation of a collective consciousness in the wider perspective of french cultural history this collection of essays selected from the proceedings of a seminar on memory given by dr emma wilson at the university of cambridge offers a fresh evaluation of memory as both a cultural and an individual phenomenon in modern and contemporary french culture including literature cinema and the visual arts anamnesia the book's title develops the aristotelian concept of anamnesis recollection as a dynamic and creative process which includes forgetting as much as remembering concealment as much as imagination memory in this extremely diverse range of essays is therefore far from being presented as a straightforward process of recalling the past but emerges as the site of research and renegotiation of contradictions and even aporia

this volume focuses on the relationship between time narrative and the fixed image as such it highlights renewed interest in the temporality of the fixed image probably

one of the most important trends in the formal and semiotic analysis of visual media in the past decade the various essays discuss paintings the illustrated covers of books comics or graphic novels photo stories postcards television and video art as well as aesthetic practices that defy categorization such as chris marker s masterpiece la jetée the range of works and practices examined is reflected in the different theoretical approaches and methods used with an emphasis on semiology and narratology and to a lesser extent aesthetics and psychoanalysis the interest of this book however does not stem exclusively from the range and scope of the artefacts examined or the methodological issues that are addressed its fundamental importance rests in the contributors readiness to question the differentiation between fixed and moving images which all too often provides a convenient if not altogether convincing starting point for image analysis the originality and value of the contribution that time narrative and the fixed image temps narration et image fixe makes to the body of theoretical writing on visual media lies in this challenging and comprehensive approach

this collection of essays is aiming at capturing the rich and complex category of the visual both in proust s novel itself in its philosophical and stylistic implications and beyond it in other visual practices cinema painting dance inspired by the novel

cet ouvrage propose d abord une lecture de textes sur la photographie la chambre claire de roland barthes le photographique de rosalind krauss l acte photographique de philippe dubois mais au delà d une explication des théories il s agit de découvrir trois redéfinitions de l auteur de son rapport à l écriture aux images et aux lecteurs enfin si la photographie était l intraitable du langage elle devient le pré texte d une histoire de l art

the photographic portrait is discussed in a wide context from general subjects such as the family photograph album and american portrait photography to the work of individual artists like sander and stieglitz
