in her introduction tymieniecka states the core theme of the present book sharply is culture an excess of nature s prodigious expansiveness an excess which might turn out to be dangerous for nature itself if it goes too far or is culture a natural congenial prolongation of nature life if the latter then culture is assimilated into nature and thus would lose its claim to autonomy its criteria would be superseded by those of nature alone of course nature and culture may both still be seen as being absorbed by the inner powers of specifically human inwardness on which view human being caught in its own transcendence becomes separated

radically in kind from the rest of existence and may not touch even the shadow of reality except through its own prism excess therefore or prolongation and on what terms the relationship between culture and nature in its technical phase demands a new elucidation here this is pursued by excavating the root significance of the multiple rationalities of life in contrast to husserl who differentiated living types according to their degree of participation in the world the phenomenology of life disentangles living types from within the onto-poietic web of life itself the human creative act reveals itself as the great divide of the logos of life a divide that does not separate but harmonizes thus dispelling both naturalistic and spiritualistic reductionism
