what differentiates this book from other healthcare improvement books is that it is the only

currently available book that presents a simple recipe of 46 lean steps for healthcare providers to reduce cost and improve quality by taking these straightforward steps healthcare providers can adopt the same lean methods which have enabled companies like toyota to become so successful the first part of the book explains cost and quality issues facing u s healthcare from that understanding the second part then teaches healthcare providers a 46 step recipe to reduce costs and improve quality by using toyota lean production methods with industry experts citing that as much as 40 of the total cost of healthcare production is attributed to wasteful processes it is logical that reducing waste will lower costs this is the basis of this book although other books have presented toyota s lean methods this book goes further by showing how to directly apply those successful methods to healthcare where they are sorely needed this book is intended to be a practical manual for healthcare providers to use to improve quality and reduce costs it can be a multi year strategic plan for healthcare providers to adopt this second edition includes additional improvement steps and five new appendices of practical examples authored by renowned lean experts

a public sector journey to operational excellence links effective government operations to the ability to accomplish bold social goals the book illustrates how the principles and techniques of continuous improvement can be applied to public sector management and public policy development the linkage of management to policy is woven throughout the four sections part 1 begins with the history and application of the principles of continuous improvement ci readers are introduced to lean and related methodology ci principles are then juxtaposed with john m bernard s categorization of three stages of maturity in government next guidance is provided on how to launch a ci initiative in the public sector leading to a discussion of public administration in theory and practice part 2 examines the application of ci to governmental operations examples such as the va s hiring process underscore the need to lean bureaucratic and regulatory processes profiles of ci work in several states illustrate both the potential and the pitfalls leading to recommendations for an optimal model part 3 acknowledges that among the responsibilities of government the public policy function is the most difficult to lean it discusses the complexities inherent in government since the public policy is both a political and an administrative function toyota kata methodology is illustrated with its potential application to the challenges of policy development it could be a force multiplier when civics and politics meet ci part 4 links the promise of ci to make government more effective enabling it to solve complex problems strategies are proposed to overcome the

threats and sustain the gains in these initiatives cognizant of the many challenges the book closes with a range of recommendations and a reflection on the purpose of government

the definitive big picture on the financial crisis from the man behind the oscar winning documentary that exposed the workings of the new economic elite based on explosive interviews court documents and corporate archives inside job traces in gripping detail how decades of deregulation gave birth to a predator nation with power players cycling through positions in government academia and wall street and continuing to do so even in the wake of the global financial crisis with stunning clarity charles ferguson delivers an uncompromising accounting of how a new economic oligarchy has wrested control of our politics and the prospects for real recovery

charles h ferguson who electrified the world with his oscar winning documentary inside job now explains how a predator elite took over the country step by step and he exposes the networks of academic financial and political influence in all recent administrations that prepared the predators path to conquest over the last several decades the united states has undergone one of the most radical social and economic transformations in its history finance has become america s dominant industry while manufacturing even for high technology industries has nearly disappeared the financial sector has become increasingly criminalized with the widespread fraud that caused the housing bubble going completely unpunished federal tax collections as a share of gdp are at their lowest level in sixty years with the wealthy and highly profitable corporations enjoying the greatest tax reductions most shockingly the united states so long the beacon of opportunity for the ambitious poor has become one of the world s most unequal and unfair societies if you re smart and a hard worker but your parents aren t rich you re now better off being born in munich germany or in singapore than in cleveland ohio or new york this radical shift did not happen by accident ferguson shows how since the reagan administration in the 1980s both major political parties have become captives of the moneyed elite it was the clinton administration that dismantled the regulatory controls that protected the average citizen from avaricious financiers it was the bush team that destroyed the federal revenue base with its grotesquely skewed tax cuts for the rich and it is the obama white house that has allowed financial criminals to continue to operate unchecked even after supposed reforms installed after the collapse of 2008 predator nation reveals how once revered figures like alan greenspan and larry summers became mere courtiers to the elite based on many newly released court filings it details the extent of the crimes there is no other word committed in the frenzied chase for wealth that caused the

financial crisis and finally it lays out a plan of action for how we might take back our country and the american dream

a sweeping new interpretation of the history of civilization and a transformative vision of how our species will thrive on an unpredictable earth the viruses keep coming the climate is warming and the earth is rewilding our human family has no playbook to address the mayhem unfolding around us if there is a change to reckon with argues the renowned economic and social theorist jeremy rifkin it is that we are beginning to realize that the human race never had dominion over the earth and that nature is far more formidable than we thought while our species seems much smaller and less significant in the bigger picture of life on earth undermining our long cherished worldview the age of progress once considered sacrosanct is on a deathwatch while a powerful new narrative the age of resilience is ascending in the age of resilience rifkin takes us on a new journey beginning with how we reconceptualize time and navigate space during the age of progress efficiency was the gold standard for organizing time locking our species into the quest to optimize the expropriation commodification and consumption of the earth's bounty at ever greater speeds and in ever shrinking time intervals with the objective of increasing the opulence of human society but at the expense of the depletion of nature space observes rifkin became synonymous with passive natural resources while a principal role of government and the economy was to manage nature as property this long adhered to temporal spatial orientation writes rifkin has taken humanity to the commanding heights as the dominant species on earth and to the ruin of the natural world in the emerging era says rifkin efficiency is giving way to adaptivity as the all encompassing temporal value while space is perceived as animated self organizing and fluid a younger generation in turn is pivoting from growth to flourishing finance capital to ecological capital productivity to regenerativity gross domestic product to quality of life indicators hyper consumption to eco stewardship globalization to glocalization geopolitics to biosphere politics nation state sovereignty to bioregional governance and representative democracy to citizen assemblies and distributed peerocracy future generations suggests rifkin will likely experience existence less as objects and structures and more as patterns and processes and come to understand that each of us is literally an ecosystem made up of the microorganisms and elements that comprise the hydrosphere lithosphere atmosphere and biosphere the autonomous self of the age of progress is giving way to the ecological self of the age of resilience the now worn scientific method that underwrote the age of progress is also falling by the wayside making room for a new approach to science called complex adaptive systems modeling likewise detached reason is losing cachet while empathy and biophilia become the

rhetoric and resistance in the corporate academy analyzes the political and legal struggles between labor movements and school administrators over the rise of part time and temporary jobs in higher education focusing particular attention on the labor of writing instruction carter finds among literacy workers both a deeply exploited segment of the campus population and a vector of resistance to the hegemony of flexible hiring contrary to visions of ivory tower seclusion he traces continuities between teachers and students experiences as corporate employees contending that their frequently insecure positions inadequate working conditions

minimal benefits and marginalized voices constitute grounds for political alliance carter then outlines a labor theory of agency that entails long range collaboration among tenure line faculty part time and non tenure track teachers and student social movements listening always for harmonies as well as dissonances among their modes of argument

manufacturing forms the base of the japanese economy and will continue to do so it is supported by a host of specialists both in end user products and intermediary components many of these specialists are not behemoths they can be described as leading medium sized enterprises or lmes this book traces the rise of these lmes it shows how they forged their own course often at variance with the ideas of the central authorities honing their art of monozukuri or making things at each point in the historical narrative actual entrepreneurs and the lmes they created are cited having contributed handsomely to japan s industrial evolution from industrialization to the information age these lmes are now globalizing and in so doing assuming a role as east asian regional specialists
