corporate restructuring acquisitions alliances and divestment is a visible form of corporate strategy for example firm investments in buying and selling assets exceed the gross domestic product of the majority of nations most research in this area examines acquisitions but informing practice is limited by examining acquisitions in isolation or using a narrow focus for example a lingering problem is that average acquisition performance is consistently around zero suggesting a need to identify practically relevant relationships in addressing this need research on three fundamental questions is covered 1 how do acquisitions relate to other corporate strategy options 2 what helps to

predict acquisition performance and 3 what are persistent acquisition research issues the first question is intended to overcome a research limitation that acquisitions are often examined independent of other corporate strategies including internal development alliances and divestment the second question addresses novel relationships associated with the primary focus of acquisition research in examining what drives acquisition performance the third question reflects on the underlying complexity of the phenomenon that makes it a challenge to identify what drives acquisition performance overall the intent of presenting ideas on these fundamental questions is to illustrate promising areas for future research this book presents the latest state of knowledge on the topic and will be of interest to researchers academics and advanced students in the fields of strategic management international business and organizational studies

the literature on rural america to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns as a result the real rural america remains much misunderstood neglected or ignored by scholars and policymakers alike in response emery castle offers the changing american countryside a volume that will forever change how we look at this important subject castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands these authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity the authors are especially effective in demonstrating why rural america is so much more than just agriculture it is in fact highly diverse complex and interdependent with urban america and the international market place most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections to do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life

from truman to clinton presidents have aggressively tried to expand their control over national government in the process they have vastly enlarged their white house staffs and politicized the federal bureaucracy with thousands of appointees in key administrative positions thomas weko argues that the presidential personnel office ppo charged with screening and recommending such appointees both exemplifies and helps explain the enormous growth of presidential power since world war ii originally conceived as a small advisory group within the white house office the ppo has grown enormously from a staff of two under truman to as many as sixty under other presidents and now oversees nearly four thousand appointments per administration weko charts the ppo s evolution and influence and shows how central it is to our understanding of modern presidential leadership weko s starting point is terry moe s rational choice theory that it is the institution of the presidency not the sitting president that fosters centralization and politicization within the executive branch amplifying and extending moe s theory weko persuasively links the ppo s explosive growth to the weakening of political parties the post eisenhower disintegration of policy networks the growing impact of television news and the public s increasing readiness to hold the president

accountable for policy failures the ppo s growth clearly has increased presidential control and bureaucratic responsiveness but weko argues those results have had unanticipated and unwanted consequences that among other things have undermined the integrity and capabilities of administrative agencies any improvement in the leadership of the executive branch he contends can only emerge from changes in the current institutional arrangement of the presidency itself based on exhaustive research in white house files oral histories and memoirs and personal interviews with over 100 white house aides weko s study provides a provocative new look at the white house office and the modern presidency
