the analysis of the mortgage market is a specialised field but examines a financial market with extremely wide ranging implications it affects the stability of the whole economy the key thing about this analysis is the increasing importance of the secondary mortgage market which in the us is now several times larger than the market for government debt the uk secondary mortgage market is also growing and the book will provide a timely resource to those active and interested in this important financial market the 1990s saw an enormous growth of mortgage market analysis as an academic subject and there is a vast literature scattered among the key real estate journals there is now a great need to not only bring this very complex subject area together but also to abstract the main issues and to render them intelligible the book will provide an organised research resource and also inform and motivate further research into the microeconomics of mortgage markets

these conference proceedings sketch a broad overview of transport economics research since the inception of the ecmt in 1953 and map out the directions for future work

urban sprawl low density subdivisions and business parks big box stores and mega malls has increasingly come to define city growth despite decades of planning and policy most urbanists view sprawl as an expensive and unsustainable pattern of development yet a few defend it as simply a reflection of consumers lifestyle preferences in perverse cities pamela blais argues that both views fail to recognize the market distortions and flawed policy that drive sprawl crude public policies and mis pricing create hidden perverse subsidies and incentives that promote sprawl while discouraging more efficient and sustainable urban forms clearly not what most planners and environmentalists have in mind blais makes the case that accurate pricing and better policy are fundamental to curbing urban sprawl and shows how this can be achieved in practice through a range of market oriented tools that promote efficient sustainable cities

this proceedings book provides selections from the 2022 topical issues in international political geography tipg meeting it addresses the main issues of contemporary political geography and international relations providing a platform for discussion and collaboration of experts primarily in the fields of political geography geopolitics and international relations participants from all over the world consider the controversies and challenges posed by globalization focusing in particular on the ideologies of globalization and regionalism migration crises prevention of ethnic conflicts and measures to promote sustainable development the content of the book will be interesting to experts academics and students in these communities

a rigorous but nontechnical treatment of major topics in urban economics lectures on urban economics offers a rigorous but nontechnical treatment of major topics in urban economics to make the book accessible to a broad range of readers the analysis is diagrammatic rather than mathematical although nontechnical the book relies on rigorous economic reasoning in contrast to the cursory theoretical development often found in other textbooks lectures on urban economics offers thorough and exhaustive treatments of models relevant to each topic with the goal of revealing the logic of economic reasoning while also teaching urban economics topics covered include reasons for the existence of cities urban spatial structure urban sprawl and land use controls freeway congestion housing demand and tenure choice housing policies local public goods and services pollution crime and quality of life footnotes throughout the book point to relevant exercises which appear at the back of the book these 22 extended exercises containing 125 individual parts develop numerical examples based on the models analyzed in the chapters lectures on urban economics is suitable for undergraduate use as background reading for graduate students or as a professional reference for economists and scholars interested in the urban economics perspective

professor dana and his colleagues have carefully and successfully put together a collection of chapters on ethnic minority entrepreneurship from all parts of the world the book comprises eight parts and 49 chapters undoubtedly given the massive size and content of a 835 page book it is fair to ask is it value for money the answer is unequivocally yes a further comment on the content of the book should probably reassure potential readers and buyers of the book this collection is undoubtedly rich creative and varied in many respects therefore it will be of great benefit to researchers and scholars alike i will strongly recommend this book to researchers students teachers and policy makers aminu mamman international journal of entrepreneurial behaviour and research the volume presents an impressive panorama of studies on ethnic entrepreneurs ranging from dalits in india to roma entrepreneurs in hungary b p corrie choice from a focus on middle man minorities in the 1950s the study of minority ethnic entrepreneurship has evolved into a vast undertaking a major ingredient in this expansion is the massive population movements of the past thirty years that have created ethnic minority communities in almost all advanced economies from new york to san francisco from birmingham to hamburg from the chinese in canada to the turks in finland to the ghanians in south africa to the lebanese in new zealand more than twenty chapters in this volume treat small scale ethnic entrepreneurship and the cultural and institutional resources which support it at the other end of the spectrum the ethnic chinese have created ever larger multi divisional enterprises in the host societies of southeast asia at the mid point of the spectrum analyzed in an elegant paper

by Ivan Light is the recently identified transmigrant entrepreneur acculturated in two societies but assimilated in neither whose special endowments have provided the lynchpin for much of the international trade expansion in the global economy over the past decade and Dana and Morris provide us with much more Afro-American entrepreneurship caste and class the theory of clubs women ethnic entrepreneurs minority ethnicity and ipos in the quality of its contributions and in the reach of its coverage this handbook attains a very high standard Peter Kilby Wesleyan University US the new handbook of research on ethnic minority entrepreneurship edited by Léo Paul Dana constitutes a major contribution to the literature on ethnic enterprise unlike previous work which tended to focus on one country or one region of the world this book is global in scope you will find chapters on America Europe and Asia as well as integrative essays that review important principles and concepts from the literature on ethnic entrepreneurship I particularly appreciate the historical and evolutionary framework within which the contributions are situated this book belongs on the shelf of everyone who has an interest in immigration and entrepreneurship or ethnic entrepreneurship more generally Howard Aldrich University of North Carolina US this exhaustive interdisciplinary handbook explores the phenomena of immigration and ethnic minority entrepreneurship in light of marked changes since the mid twentieth century and the advent of easier more affordable travel and more open and integrated national economies the international contributors key experts in their respective fields illustrate that myriad ethnic minorities exist across the globe and that their entrepreneurship can and does significantly influence national economies the contributors go on to promote our understanding of which factors make for successful entrepreneurship and perhaps more importantly how negative political consequences that members of successful entrepreneurial ethnic minorities might face can be minimized this extensive collection of current research on entrepr

includes annual list of doctoral dissertations in political economy in progress in American universities and colleges and the hand book of the American Economic Association

thorough and authoritative regional and urban economics and economic development theory and methods provides students with a sound approach to analyzing the economic progress of a region or urban area the textbook is divided into four sections for ease of reference the first section market areas and firm location analysis introduces spatial economics and location theory while the next section regional growth and development analyzes regional growth and development models and policy introducing the foundations of urban economics urban land use and urban form examines land rent land use patterns and the effects of attempts to control land uses the final section urban problems and policy investigates local public finance and introduces the policy analysis involved in countering urban problems addressing these topics from the perspectives of how they affect the population at large and how they become established within public policy regional and urban economics and economic development theory and methods provides students with an essential foundation not only to understand but also to contemplate the dynamics of varying economic factors as they relate to an area's growth
