this edited volume is a comprehensive presentation of views on the relations between metaphysics and logic from aristotle through twentieth century philosophers who contributed to the return of metaphysics in the analytic tradition the collection combines interest in logic and its history with interest in analytical metaphysics and the history of metaphysical thought by so doing it adds both to the historical understanding of metaphysical problems and to contemporary research in the field throughout the volume essays focus on metaphysica generalis or the systematic study of the most general categories of being beginning with aristotle and his categories the volume goes on to trace metaphysics and logic through the late ancient and arabic traditions examining the views of thomas aquinas duns scotus and william ockham moving into the early modern period contributors engage with leibniz s metaphysics kant s critique of metaphysics the relation between logic and ontology in hegel and bolzano s views subsequent chapters address charles s peirce s logic and metaphysics the relevance of set theory to metaphysics meinong s theory of objects husserl s formal ontology early analytic philosophy c i lewis and his relation to russell and the relations between frege carnap and heidegger surveying metaphysics through to the contemporary age essays explore w v quine s attitude towards metaphysics wilfrid sellars s relation to antidescriptivism as it connects to kripke s the views of putnam and kaplan peter f strawson s and david m armstrong s metaphysics trope theory and its relation to popper s conception of three worlds the volume ends with a chapter on transcendental philosophy as ontology in each chapter contributors approach their topics not merely in an historical and exegetical fashion but also engage critically with the thought of the philosophers whose work they discuss offering synthesis and original philosophical thought in the volume in addition to very extensive and well informed analysis and interpretation of important philosophical texts the volume will serve as an essential reference for scholars of metaphysics and logic

this is an edition of what are arguably leibniz s three most important presentations of his metaphysical system the discourse on metaphysics from 1686 and the principles of nature and of grace and the monadology from 1714 based on the latta and montgomery translations and revised by the editor these texts set out the essentials of leibniz s mature metaphysical views the edition includes an introductory essay and a set of appendices of seventeenth and eighteenth century texts which help illuminate and contextualize leibniz s ideas among these are extensive passages from leibniz s theodicy many of which are cited in the monadology

the question of the proper role of metaphysics in philosophy of science is both significant and contentious the last few decades have seen considerable engagement with philosophical projects aptly described as the metaphysics of science inquiries into natural laws and properties natural kinds causal relations and dispositions at the same time many metaphysicians have begun moving in the direction of more scientifically informed scientific or naturalistic metaphysics and yet many philosophers of science retain a deep suspicion about the significance of metaphysical investigations into science this volume of new essays explores a broadly methodological question what role should metaphysics play in our philosophizing about science these new essays written by leading philosophers of science address this question both through ground level investigations of particular issues in the metaphysics of science and by more general methodological inquiry

discourse on metaphysics and other essays contains complete translations of the two essays that constitute the best introductions to leibniz s complex thought discourse on metaphysics of 1686 and monadology of 1714 these are supplemented with two essays of special interest to the student of modern philosophy on the ultimate origination of things of 1697 and the preface to his new essays of 1703 1705 the translations are taken from leibniz philosophical essays edited and translated by roger ariew and daniel garber hackett 1989

in may 2010 philosophers family and friends gathered at the university of notre dame to celebrate the career and retirement of alvin plantinga widely recognized as one of the world s leading figures in metaphysics epistemology and the philosophy of religion plantinga has earned particular respect within the community of christian philosophers for the pivotal role that he played in the recent renewal and development of philosophy of religion and philosophical theology each of the essays in this volume engages with some particular aspect of plantinga s views on metaphysics epistemology or philosophy of religion contributors include michael bergman ernest sosa trenton merricks richard otte peter vaninwagen thomas p flint eleonore stump dean zimmerman and nicholas wolterstorff the volume also includes responses to each essay by bas van fraassen stephen wykstra david vanderlaan robin collins raymond vanarragon e j coffman thomas crisp and donald smith

reprint of the original first published in 1859

this volume illustrates how the methodology of metaphysics can be enriched with the help of cognitive science issues to which results from cognitive science are

brought to bear include the metaphysics of time of morality of meaning of modality of objects and of natural kinds as well as whether god exists
