a rigorous but nontechnical treatment of major topics in urban economics lectures on urban economics offers a rigorous but nontechnical treatment of major topics in urban economics to make the book accessible to a broad range of readers the analysis is diagrammatic rather than mathematical although nontechnical the book relies on rigorous economic reasoning in contrast to the cursory theoretical development often found in other textbooks lectures on urban economics offers thorough and exhaustive treatments of models relevant to each topic with the goal of revealing the logic of economic reasoning while also teaching urban economics topics covered include reasons for the existence of cities urban spatial structure urban sprawl and land use controls freeway congestion housing demand and tenure choice housing policies local public goods and services pollution crime and quality of life footnotes throughout the book point to relevant exercises which appear at the back of the book these 22 extended exercises containing 125 individual parts develop numerical examples based on the models analyzed in the chapters lectures on urban economics is suitable for undergraduate use as background reading for graduate students or as a professional reference for economists and scholars interested in the urban economics perspective

over the past thirty years urban economic theory has been one of the most active areas of urban and regional economic research just as static general equilibrium theory is at the core of modern microeconomics so is the topic of this book the static allocation of resources within a city and between cities at the core of urban economic theory an essay on urban economic theory well reflects the state of the field part i provides an elegant coherent and rigorous presentation of several variants of the monocentric city model as the centerpiece of urban economic theory treating equilibrium optimum and comparative statistics part ii explores less familiar and even some uncharted territory the monocentric model looks at a single city in isolation taking as given a central business district surrounded by residences part ii in contrast makes the intra urban location of residential and non residential activity the outcome of the fundamental tradeoff between the propensity to interact and the aversion to crowding the resulting pattern of agglomeration may be polycentric part ii also develops models of an urbanized economy with trade between specialized cities and examines how the market determined size distribution of cities differs from the optimum this book launches a new series advances in urban and regional economics the series aims to provide an outlet for longer scholarly works dealing with topics in urban and regional economics

øthis groundbreaking book will prove to be an invaluable resource and a rewarding read for academics practitioners and policymakers interested in the economics of urban policy urban planning and development as well as international studies and innov

urban economics uses economic theory to analyze cities as well as urban issues and problems the authors discuss the economic history of u s urbanization and regional shifts and then go on to examine basic theoretical models including the open city model against real world urban environments the text concludes by critically evaluating urban problems and the public sector including discussions of the housing market transportation local government pollution and environmental quality and urbanization in developing countries the fifth edition includes more coverage on education and an entirely new chapter on housing financiers

bringing urban issues into a modern microeconomic framework this work uses basic economic analysis to explain why cities exist where they develop how they grow and how various activities are arranged within them census data is incorporated into the text and used in charts and tables

this volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning the authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses in bridging this gap the book highlights the best scholarship in

planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics

dynamic analysis of the urban economy provides a dynamic analysis of business and residential economic activities in urban areas this book is organized into four parts encompassing 13 chapters that cover some insights into the dynamic processes of complex urban relationships through construction and analysis of simple dynamic models of the urban economy as well as the development of the so called dynamic urban economics within the framework of general dynamic economics the introduction is a preview of the basic ideas about dynamics this topic is followed by discussion on the theoretical analyses of dynamic urban systems part 1 emphasizes the dynamic stability property of spatial equilibrium and its relation to comparative statics part 2 considers the effects of various kinds of externalities on the dynamic property of the urban economy while part 3 examines the long run growth processes of the urban economy and their optimality property part 4 looks into the optimal size and configurations of an urban area in connection with agglomeration economies and traffic congestion this book will be of great value to economic theorists

this book was first published in 1977 urban economics is a relatively young field of economics hardly existing except perhaps in real estate and land economics curricula before the 1960s within the last few years especially after 1971 there has been a growth of interest in urban economic theory strong enough even to attract the attention of general economic theorists these new theoretical writings have been named the new urban economics now for short the aim of this monograph is to survey and assess now to evaluate its contribution to urban economics to offer a few extensions and to say something about the future direction of the subfield

the purpose of this book is to provide a key text on urban economics in a global context the book is driven by the themes of urban economics urban growth housing property investment and development etc and the different approaches to these themes taken in different regions of the world are introduced and exemplified in boxes within each chapter

a collection of the first section of the fundamentals of pure and applied economics series regional and urban economics parts one and two is an encyclopaedia containing eight titles this volume highlights original contributions in regional and urban economics concentrating mainly on urban economic theory the contributions focus on the treatment of space in economic theory drawing on the body of literature developed by von thunen christaller and losch these chapters explore empirical theoretical and applied aspects of urban and regional economics which can be divided into the following areas location theory jean jaskold gabrzewicz jacques francois thisse masahisa fujita and urs schwiezer urban public finance david e wildasin urban dynamics and urban externalities takahiro miyao and yoshitsugu kanemoto systems of cities and facility location

the economics of neighborhood integrates neighborhood into contemporary notions of the urban economy neighborhood is viewed as a good with demand supply and equilibrium aspects topics covered range from demand for neighborhood and interneighborhood mobility to neighborhood choice and transportation services the role of governments as suppliers of neighborhoods is also considered comprised of 12 chapters this book begins with an introduction to some of the efforts to measure neighborhood effects and the approaches used in analyzing the role of neighborhood in the urban economy the next section deals with the determinants of neighborhood

demand in different eastern and midwestern cities in the united states in the mid to late 1960s the location choice of a sample of pittsburgh households is examined along with the role that neighborhood transition at the origin played in governing the decision to move or stay put subsequent chapters focus on the neighborhood choice of households already living in washington d c in 1968 as a joint prior choice of residential location housing type automobile ownership and mode of travel to work how the supply of certain kinds of neighborhoods can be determined by the interaction of residential demand and housing supply in the private sector and optimum neighborhood supply by local governments the concluding section analyzes neighborhood in an equilibrium setting with emphasis on price outcomes and the quantity aspects of neighborhood this monograph will be of value to economists as well as to researchers and students interested in urban economics

a companion to urban economics provides a state of the art overview of this field communicating its intellectual richness through a diverse portfolio of authors and topics unique in both its rigor and international treatment an ideal supplementary textbook in upper level undergraduate urban economics courses or in master s level and professional courses providing students with the necessary foundation to tackle more advanced topics in urban economics contains contributions from the world s leading urban economists

this integrated collection of essays exploring the economic theory of cities assembles work by a number of the world s leading exponents
