a new multi coloured manual this book is a successor to and replacement for the highly respected manual and handbook on the benefits of flood and coastal risk management produced by the flood hazard research centre at middlesex university uk with support from defra and the environment agency it builds upon a previous book known as the multi coloured manual 2005 which itself was a synthesis of the blue 1977 red 1987 and yellow manuals 1992 as such it expands and updates this work to provide a manual of assessment techniques of flood risk management benefits indirect benefits and coastal erosion risk management benefits it has three key aims first it provides methods and data which can be used for the practical assessment of schemes and policies secondly it describes new research to update the data and improve techniques thirdly it explains the limitations and complications of benefit cost analysis to guide decision making on investment in river and coastal risk management schemes

in the light of anecdotal accounts of accidents involving the vehicles but little hard evidence mps urge the government to collect better data on the use of scooters as well as incidents and injuries where they are involved to develop sound policy we need a comprehensive evidence base detailing the number and nature of incidents involving mobility scooters on the uk s pavements and roads only by doing so will issues such as the legal status of mobility scooters the appropriateness of proficiency tests and the rights of users to take the vehicles on public transport be adequately addressed the committee s report notes that the department for transport has launched a consultation on many of these issues but is concerned that after a similar review in 2005 ministers failed to act on many of its findings with a growing number of mobility scooter users on the uk s pavements and roads the mps call on the government to take decisive action where necessary
