le mentalisme est un art du spectacle qui consiste à utiliser un mélange d'astuce d'illusion de suggestion et de psychologie pour créer des démonstrations déroutantes qui donnent souvent l'impression d'un don paranormal mais il ne s'agit que d'une impression bien souvent les secrets mis en œuvre pour les exécuter sont plus incroyables encore que les expériences elles-mêmes. Viktor Vincent cultive ce savoir-faire et le partage grâce à ses spectacles son défi aujourd'hui est de nous initier à son art avec quelques mises en scène et exercices ludiques le lecteur peut apprendre les capacités d'un mentaliste et les appliquer au quotidien. Viktor nous explique entre autres comment entraîner notre mémoire, jouer avec les statistiques, connaître les dessous de certains tours, déchiffrer le comportement de nos interlocuteurs, finir comment notre cerveau fonctionne et comment parfois il nous trahit en faisant surgir des émotions visuelles mais aussi dans quelle mesure ce que nous voyons n'est pas forcément la réalité. Prenez le contrôle de l'esprit.

When radio broadcasting began in the early 1920s, the radio was a magic box aglow with the future, drawing humanity into a new age. Some thought it would dissolve the distance between time and place; others that human minds would become transparent. One tuned to another. Performers claiming psychic powers turned radio broadcasting into a fabulous money machine. These mentalists, born from vaudeville, circuses, sideshows and the spiritualist and New Thought movements of the mid-late 19th century, used the language of wireless technology to explain their ability to see the past, present and future, casting their mystical knowledge as a scientifically honed craft. These mentalists persuaded millions to pay for dubious advice until governmental and public pressures forced them off the air. This book is a history of over 25 performers who practiced their art behind studio microphones during the early years of radio broadcasting from about 1920 to 1940. Here laid out for the first time is the tale of how they made cash rain from the heavens and harnessed the sensation of the radio in search of wealth, health, love and success.

it is widely supposed that david hume invented and espoused the regularity theory of causation holding that causal relations are nothing but a matter of one type of thing being regularly followed by another it is also widely supposed that he was not only right about this but that it was one of his greatest contributions to philosophy strawson here argues that the regularity theory of causation is indefensible and that hume never adopted it in any case strawson maintains that hume did not claim that causation in the natural world is just a matter of regular succession that such a dogmatic metaphysical claim about the nature of reality would have been utterly contrary to his fundamental philosophical principles and that he rightly took it for granted that there was more to causation than regularity of succession claiming only that regularity of succession was all that we could ever know of causation
