between 1937 and 1938 garden designer christopher tunnard published a series of articles in the british architectural review that rejected the prevailing english landscape style inspired by the principles of modernist art and japanese aesthetics tunnard called for a new technique in garden design that emphasized an integration of form and purpose the functional garden avoids the extremes both of the sentimental expressionism of the wild garden and the intellectual classicism of the formal garden he wrote it embodies rather a spirit of rationalism and through an aesthetic and practical ordering of its units provides a friendly and hospitable milieu for rest and recreation tunnard's magazine pieces were

republished in book form as *Gardens in the Modern Landscape* in 1938 and a revised second edition was issued a decade later taken together these articles constituted a manifesto for the modern garden its influence evident in the work of such figures as Lawrence Halprin, Philip Johnson and Edward Larrabee Barnes long out of print the book is here reissued in a facsimile of the 1948 edition accompanied by a contextualizing foreword by John Dixon Hunt. *Gardens in the Modern Landscape* heralded a sea change in the evolution of twentieth century design and it also anticipated questions of urban sprawl, historic preservation and the dynamic between the natural and built environments available once more to students, practitioners and connoisseurs it stands as a historical document and an invitation to continued innovative thought about landscape architecture.

The elements of garden architecture—paths, walls, gates, fences, terraces, sheds, lighting, furniture, waterworks and art—together form the backbone of any well designed garden. In this beautifully illustrated and accessible book, legendary landscape architect James Van Sweden explains how to design and build a garden like a professional. He leads his readers on a tour through some of his most exquisitely designed gardens in the country, in the city, in the suburbs and by the shore. When it comes to planning a comfortable and rewarding garden, Van Sweden writes in his introduction, the challenges that confront the owner of an estate or a weekend cottage are often substantially the same. The principles and techniques used for organizing a large site work equally well in a more modest setting. Each case study highlights a particular architectural element, breaking it down into practical ideas that any gardener can apply to his or her own garden or yard. The book includes dozens of detailed schematic drawings that can be used to build many of the elements described by the author, along with an extensive illustrated glossary. *Architecture in the Garden* is sure to inspire you with its many practical ideas on how to domesticate your landscape and design an outdoor space that suits your taste as well as your lifestyle.
