one of the common themes in recent public debate has been the law's inability to accommodate the new ways of creating distributing and replicating intellectual products in this book the authors argue that in order to understand many of the problems currently confronting the law it is necessary to understand its past this is its first detailed historical account in this book the authors explore two related themes first they explain why intellectual property law came to take its now familiar shape

with sub categories of patents copyright designs and trade marks secondly the authors set out to explain how it is that the law grants property status to intangibles in doing so they explore the rise and fall of creativity as an organising concept in intellectual property law the mimetic nature of intellectual property law and the important role that the registration process plays in shaping intangible property

intellectual property ip rights impact innovation in diverse ways this book critically analyses whether additional rights beyond patents trademarks and copyrights are needed to promote innovation featuring contributions from thought leaders in the field of ip this book examines the check and balances that already exist in the ip system to safeguard innovation and questions to what extent existing ip regimes are capable of catering to new paradigms of innovation and creativity

the technological revolution of the late twentieth century has presented enormous problems in the field of intellectual property not only have photocopiers and tape recorders provided ample scope for the infringement of well recognised rights but also the devisers of such elusive properties as computer software have sought protection in the field of intellectual property law this book attempts to tackle the whole range of intellectual property as it applies in the united kingdom within the pages of a single volume emphasis is placed throughout the book on the way in which the law has developed and on the prospects for future change following an introduction which covers both the historical development of intellectual property rights and the techniques for their enforcement the book divides into sections dealing with patents for inventions copyright confidential information and trade marks and names the developing european dimension to intellectual property law is proof of the tremendous economic significance of protecting commercial information the european patent convention has been put into operation there are proposals for a community trade mark for harmonisation of copyright and national trade mark laws at the same time there are tensions created by the clash of those policies designed to cope with distortions of competition and trade barriers on the one hand and those protecting the fruits of intellectual labour on the other

in 2009 the association for the advancement of teaching and research in intellectual

property atrip dedicated its yearly congress to the theme horizontal issues in ip law uncovering the matrix that theme and the main concern of the so called intellectual property of transition project have been brought together by the editors of the current book under the intriguing title the structure of intellectual property law questioned is whether the apparent compartmentalisation and fragmentation of actual intellectual property law can be based upon a coherent system that supports the entire field in other words it is questioned whether one organising principle which underlies the different parts of this domain of law can be found not surprisingly the answers given by the various experts that contribute to this book tend to differ mainly depending on their field of interest copyright law patent law trademark law the main tendency being in favour of tailoring instead of unifying both from the perspective of efficiency and that of economics however even more interesting than the answers to the question posed are the stimulating and thought provoking analyses which the book offers this is really a book one should read if one is interested in the conjunction of the basic principles of intellectual property law and how they work out in practice willem grosheide utrecht university the netherlands today intellectual property is a broad genus embracing various more specific species invention patents copyright trade marks and so forth anyone concerned with how this ever expanding grouping is developing should read the fourteen essays in this book written by leading scholars they tackle not only the relationships between the species but also those between sub species originally presented as papers to the association for teaching and research in ip the writing is both subtle and full of verve strongly recommended william cornish cambridge university uk this well researched and highly topical book analyses whether the ever increasing degree of sophistication in intellectual property law necessarily leads to fragmentation and inconsistency or whether the common principles informing the system are sustainable enough to offer a solid and resilient framework for legal development

introduction intellectual property rights foster innovation but if as it surely does intellectual property means not just intellectual property rules the law of patents copyrights trademarks designs trade secrets and unfair competition but also intellectual property institutions the courts police regulatory agencies and collecting soc ties that administer these rules what are the respective roles of intellectual property rules and institutions in fostering creativity and to what extent do forces outside intellectual property rules and institutions economics culture politics history also contribute to innovation is it possible that these other factors so overwhelm the impact of intellectual property regimes that it is futile to expect adjustments in intellectual property rules and institutions to alter patterns of inno tion and ultimately economic development it was to address these questions in the most dynamic region of the world today asia that we invited leading country experts to contribute studies that not

only summarize the current condition of intellectual property regimes in countries ranging in economic size from Cambodia to Japan and in population from Laos to China but that also describe the historical sources of these laws and institutions the realities of intellectual property enforcement in the marketplace and the political economic educational and scientific infrastructures that sustain and direct investment in innovative activity a

this book critically reviews the recurrent debate on intellectual property law and policy in developing countries carried out in the last decade it identifies the still unresolved policy issues and proposes alternative approaches that resonate with the needs for transformation of the economic and social reality of developing countries focusing on emerging economies in Asia the work draws the wider lessons to be learnt by researchers policy makers legislators and the business sector in general and concludes by putting forward proposals for reform
