a classic treasury of inspiration featuring hundreds of passages and quotations selected from the wisdom of the ages offering invaluable insight and guidance on the challenges of daily life here are not only the best of the world's most inspiring thoughts and ideas but the stories behind them how they came to be written and what their impact has been on others a storehouse of inspired and inspiring reading it is a collection of brief stimulating biographies as well there are selections from john burroughs alfred tennyson robert browning elizabeth barrett browning abraham lincoln franklin d roosevelt william cullen bryant ralph waldo emerson william shakespeare hippocrates confucius and many others a distillation of the greatest thoughts ideas and philosophies that have been handed down to us through the ages this is a book to turn to over and over again a book of moral spiritual and ethical guidance an unfailing source of comfort and inspiration for all

the first edition of this book was published in 2008 and it went on to become iwa publishing s bestseller clearly there was a need for it because over the twenty years prior to 2008 the knowledge and understanding of wastewater treatment had advanced extensively and moved away from empirically based approaches to a fundamental first principles approach based on chemistry microbiology physical and bioprocess engineering mathematics and modelling however the quantity complexity and diversity of these new developments was overwhelming for young water professionals particularly in developing countries without readily available access to advanced level tertiary education courses in wastewater treatment for a whole new generation of young scientists and engineers entering the wastewater treatment profession this book assembled and integrated the postgraduate course material of a dozen or so professors from research groups around the world who have made significant contributions to the advances in wastewater treatment this material had matured to the degree that it had been codified into mathematical models for simulation with computers the first edition of the book offered that upon completion of an in depth study of its contents the modern approach of modelling and simulation in wastewater treatment plant design and operation could be embraced with deeper insight advanced knowledge and greater confidence be it activated sludge biological nitrogen and phosphorus removal secondary settling tanks or biofilm systems however the advances and developments in wastewater treatment have accelerated over the past 12 years since publication of the first edition while all the chapters of the first edition have been updated to accommodate these advances and developments some such as granular sludge membrane bioreactors sulphur conversion based bioprocesses and biofilm reactors which were new in 2008 have matured into new industry approaches and are also now included in this second edition the target readership of this second edition remains the young water professionals who will still be active in the field of protecting our precious water resources long after the aging professors who are leading some of these advances have retired the authors all still active in the field are aware that cleaning dirty water has become more complex but that it is even more urgent now than 12 years ago and offer this second edition to help the young water professionals engage with the scientific and bioprocess engineering principles of wastewater treatment science and technology with deeper insight advanced knowledge and greater confidence built on stronger competence

energy efficient lighting is said to be one of the most cost effective approaches to save energy and reduce c02 emissions in order to stimulate the application of lighting retrofits of good quality ie a task 50 subtask b daylighting and electric lighting solutions has looked into the assessment of existing and new technical retrofit solutions in the field of façade and daylighting technology electric lighting and lighting controls the document provides information for those involved in the development of retrofit products or involved in the decision making process of a retrofit project such as buildings owners authorities designers and consultants as well as the lighting and façade industry this source book addresses both electric lighting solutions and daylighting solutions and offers a method to compare these retrofit solutions on a common basis including a wide range of quality criteria of cost related and lighting quality

aspects simple retrofits such as replacing a lamp or adding interior blinds are widely accepted often applied because of their low initial costs or short payback periods the work presented in this report aims at promoting state of the art and new lighting retrofit approaches that might cost more but offer a further reduction of energy consumption while improving lighting quality to a greater extend energieeffiziente beleuchtung ist eine der effektivstenmöglichkeiten energie zu sparen und damit die emission von co2 zu vermindern im rahmen des iea task 50 subtask b daylighting and electric lighting solutions wurden daher neue und vorhandene technische sanierungslösungen für gebäude in den bereichen fassade tageslichttechnik künstliche beleuchtung sowie lichtsteuerung bewertet um die anwendung hochwertiger lösungen voranzutreiben die informationen sind dabei für alle in den sanierungsprozess einbezogenen personen von großem interesse wie z b gebäudeeigentümer behörden planer und berater aber auch für hersteller und entwickler von beleuchtungs und fassadenlösungen betrachtet werden sowohl künstliche als auch beleuchtungslösungen mit tageslicht wobei eine methode entwickelt wurde die sanierungslösungen grundlegend miteinander zu vergleichen hierbei werden zahlreiche kriterien berücksichtigt die energetische lichttechnische thermische und kostenbezogene aspekte beinhalten einfache sanierungsmaßnahmen wie der austausch von lampen oder die montage innenliegender jalousien werden weitgehend akzeptiert und oft verwendet da sie kostengünstig sind und sich schnell amortisieren die vorliegende arbeit hat es sich zum ziel gesetzt die anwendung neuer und dem stand der technik entsprechender beleuchtungslösungen für die sanierung zu fördern diese verursachen zwar eventuell höhere kosten ermöglichen jedoch eine weitere energieeinsparung bei gleichzeitiger verbesserung der beleuchtungsqualität
