inverse scattering problems and their application to nonlinear integrable equations is devoted to inverse scattering problems isps for differential equations and their application to nonlinear evolution equations nlees the book is suitable for anyone who has a mathematical background and interest in functional analysis partial differential equations

equations of mathematical physics and functions of a complex variable this book is intended for a wide community working with inverse scattering problems and their applications in particular there is a traditional community in mathematical physics in this monograph the problems are solved step by step and detailed proofs are given for the problems to make the topics more accessible for students who are approaching them for the first time features the unique solvability of isps are proved the scattering data of the considered inverse scattering problems isps are described completely solving the associated initial value problem or initial boundary value problem for the nonlinear evolution equations nlees is carried out step by step namely the nlee can be written as the compatibility condition of two linear equations the unknown boundary values are calculated with the help of the lax generalized equation and then the time dependent scattering data sd are constructed from the initial and boundary conditions the potentials are recovered uniquely in terms of time dependent sd and the solution of the nlees is expressed uniquely in terms of the found solutions of the isp since the considered isps are solved well then the sps generated by two linear equations constitute the inverse scattering method ism the application of the ism to solving the nlees is consistent and is effectively embedded in the schema of the ism
