differs from an atlas of histology with functional correlations. It explains basic histology concepts through realistic full color composite and idealized illustrations of histologic structures. Added to the illustrations are actual photomicrographs of similar structures, a popular trademark of the atlas. All structures are directly correlated with the most important and essential functional correlations, allowing students to efficiently learn histologic structures and their major functions at the same time. This new edition features a new chapter on cell biology, accompanied by both drawings and representative photomicrographs of the main stages in the cell cycle during mitosis. Contents are reorganized into four parts progressing logically from methods and microscopy through tissues and systems. Differs from an atlas of histology is the perfect resource for medical and graduate histology students.

The second edition presents a compact and concise alternative to the larger histology texts on the market today. Great for students with a limited amount of time to devote to the subject. Improvements to the art program, adding more color and new illustrations, have been made to this edition.
