hilary janks addresses key questions about literacy and power in this landmark text that is both engaging and accessible her central argument is that competing orientations to critical literacy education domination power access diversity design foreground one over the other but are crucially interdependent and need to work together to create possibilities for redesign

and social action that serve a social justice agenda she examines the theory underpinning each orientation and develops new theory in the argument for interdependence and integration sitting at the interface between theory and practice constantly moving from one to the other the text is rich with examples of how to use these orientations in real teaching contexts and how to use them to counterbalance one another in the groundbreaking final chapter janks considers how the rationalist underpinning of critical literacy tends to exclude the non rational shows ways of working beyond reason pleasure and play desire and the unconscious and makes the case that these need to be taken seriously given their power to cut across the work of critical literacy educators working from any orientation

the editors discuss the transformative possibilities of literacy through a collection of 12 articles originally published in primary voices k 6 based on a view of literacy as social practice this book highlights the ways in which classroom teachers and educators have practiced and imagined teaching literacy in everyday classrooms the twelve essays published here originally appeared in the ncte journal primary voices k 6 and highlight four key issues essential to literacy practice in elementary classrooms access meaning making inquiry and transformation the individual essays challenge us to go beyond a view of literacy as a simple matter of skill and help to realize its transformative power in providing a contemporary conceptual framework and further resources the editors have looked not only back to primary voices k 6 but also forward noting that the practices reported in the book represent only the tip of what is possible and including throughout the volume discussions of what the future might look like and how particular sets of social practices might mature and evolve
