phenomenology and existentialism transformed understanding and experience of the twentieth century to their core they had strikingly different inspirations and yet the two waves of thought became merged as both movements flourished the present collection of research devoted to these movements and their unfolding interaction is now especially revealing the studies in this first volume to be followed by two succeeding ones range from the predecessors of existentialism Kierkegaard Jean Wahl Nietzsche to the work of its adherents Shestov Berdyaev Unamuno Blondel Blumenberg Heidegger and Mamardashvili Dufrenne and Merleau-Ponty to existentialism's congruence with Christianity or with atheism among the leading Husserlian insights are treated essence and experience the place of questioning ethics and intentionality temporality and passivity and the life world the following book will uncover the perennial concerns guiding the wondrous interplay of these two inspirational sources

phenomenology and the arts develops the interplay between phenomenology as a historical movement and a descriptive method within continental philosophy and the arts divided into five themes the book explores first how the phenomenological method itself is a kind of artistic endeavor that mirrors what it approaches when it turns to describe paintings dramas literature and music from there the book turns to an analysis and commentary on specific works of art within the visual arts literature music and sculpture contributors analyze

important historical figures in phenomenology kant hegel husserl heidegger and merleau ponty but there is also a good deal of work on art itself warhol klee jazz and contemporary and renaissance artists and artworks edited by peter r costello and licia carlson this book will be of interest to students in philosophy the arts and the humanities in general and scholars of phenomenology will notice incredibly rich groundbreaking research that helps to resituate canonical figures in phenomenology with respect to what their works can be used to describe

this book investigates the complex sometimes fraught relationship between phenomenology and the natural sciences the contributors attempt to subvert and complicate the divide that has historically tended to characterize the relationship between the two fields phenomenology has traditionally been understood as methodologically distinct from scientific practice and thus removed from any claim that philosophy is strictly continuous with science there is some substance to this thinking which has dominated consideration of the relationship between phenomenology and science throughout the twentieth century however there are also emerging trends within both phenomenology and empirical science that complicate this too stark opposition and call for more systematic consideration of the inter relation between the two fields these essays explore such issues either by directly examining meta philosophical and methodological matters or by looking at particular topics that seem to require the resources of each including imagination cognition temporality affect imagery language and perception

annotation prompted and ever diversified by the specifically human interrogative logos scientific inquiries seek a common system of links in order to mutually confirm and rectify their results coming closer and closer to phenomenology the sciences of life find the common ground of the reality in the ontopoiesis of life could it not be that the interrogative logos of science participating in human creative inventiveness will bring together also the divergent scientific methods in a common network a network which comprises natural processes societal sharing in life and existential communication nbsp papers by gary backhaus anjana bhattacharjee simon du plock ignacy fiut maria golaszewska wendy c hamblet alexandr kouzmin nikolay kozhevnikov olga louchakova jarlath mc kenna amy louise miller aria omrani arthur piper leszek pyra w kim rogers a l samian camilo serrano bonitto natalia smirnova eva syristova anna teresa tymieniecka roberto verolini eldon c wait leo zonneveld

in the ontological roots of phenomenology rethinking the history of phenomenology and its religious turn anna jani examines the common methodological background of phenomenology through attention to the phenomenon of being the existential experience of religiosity can be phenomenologically described by the ontological difference between being and beings jani demonstrates that the methodological inquiries connect closely with the ontological source of phenomenology first she elaborates on the contributions of hedwig conrad martius roman ingarden and edith stein from the point of view of heidegger s influence on the early phenomenologists from husserl s students second she analyzes heidegger s reinterpretation of his own earlier thinking after the turn which is formulated in the idea of the new beginning of philosophical thinking in the contributions to philosophy in the context of clarifying the difference between being and beings her third hypothesis about ricœur s critique of heidegger reveals an ethical level the primordiality of the ethical dimension of the action reveals the ontological foundation of the hermeneutical phenomenological situation

phenomenology is the philosophy of our times through the entire twentieth century this philosophy unfolded and flourished following stepwise the intrinsic logic and dynamism of its original project as proposed by its founder edmund husserl now its seminal ideas have been

handed over to a new era the worldwide contributors to this volume make it manifest that phenomenological inspiration knows no cultural barriers it penetrates and invigorates not only philosophical disciplines but also most of the sectors of knowledge transforming our way of seeing the world our actions toward others and our lives phenomenology's universal spread has however oftentimes diluted its original sense even beyond recognition and led to a weakening of its dynamics there is at present an urgent need to retrieve the original understanding of phenomenology to awaken its dormant forces and redirect them this is the aim of the present book resuscitation and reinvigoration it is meant to be not only a reference work but also a guide for research and study to restore the authentic vision of phenomenology we propose returning to its foundational source in husserl's project of a universal science unpacking all its creative capacities in the three parts of this work there are traced the stages of this philosophy's progressive uncovering of the grounding levels of reality ideal structures constitutive consciousness the intersubjective lifeworld and beyond the key concepts and phases of husserl's thought are here exfoliated then the thought of the movement's classical figures and of representative thinkers in succeeding generations is elucidated phenomenology's geographic spread is reviewed we then proceed to the culminating work of this philosophy to the phenomenological life engagements so vigorously advocated by husserl to the life significant issues phenomenology addresses and to how it has enriched the human sciences lastly the phenomenological project's new horizons on the plane of life are limned horizons with so powerful a draw that they may be said not to beckon but to summon here is the movement's vanguard this collection has 71 entries each entry is followed by a relevant bibliography there is a helpful glossary of terms and an index of names

an exploration of the terrain of consciousness in the light of its temporality from the father of phenomenology the phenomenology of internal time consciousness is a translation of edmund husserl's *vorlesungen zur phänomenologie des inneren zeitbewußtseins* the first part of the book was originally presented as a lecture course at the university of göttingen in the winter semester of 1904 1905 while the second part is based on additional supplementary lectures that he gave between 1905 and 1910 the pervading theme of these essays and lectures is the temporal constitution of a pure datum of sensation and the self constitution of phenomenological time which underlies such a constitution husserl identifies two categories of temporality retention and protention and outlines how temporality provides the form for perception phantasy imagination memory and recollection he demonstrates a distinction between cosmic and phenomenological time and explores the relevance of phenomenological time for the constitution of temporal objects the ideas husserl developed here are explored further in his ideas and were pursued until the end of his philosophical career as an addition to the small body of husserl's writings now available in english ideas 1931 meditations 1960 this book is essential to even a small collection of source works on contemporary philosophy choice

heidegger's lecture course at the university of marburg in the summer of 1925 an early version of being and time 1927 offers a unique glimpse into the motivations that prompted the writing of this great philosopher's master work and the presuppositions that gave shape to it the book embarks upon a provisional description of what heidegger calls *dasein* the field in which both being and time become manifest heidegger analyzes *dasein* in its everydayness in a deepening sequence of terms being in the world worldhood and care as the being of *dasein* the course ends by sketching the themes of death and conscience and their relevance to an ontology that makes the phenomenon of time central theodore kiesel's outstanding translation permits english speaking readers to appreciate the central importance of this text in the development of heidegger's thought

this volume is a selection of revised papers delivered at a conference on dilthey and phenomenology in 1983 the conference was one of five international meetings held in 1983 to celebrate both the 150th anniversary of william dilthey s birth and the 100th anniversary of the publication of the first volume of his first major theoretical work the introduction to the human sciences

christophe bouton s time and freedom addresses the problem of the relationship between time and freedom as a matter of practical philosophy examining how the individual lives time and how her freedom is effective in time bouton first charts the history of modern philosophy s reengagement with the aristotelian debate about future contingents beginning with leibniz while kant husserl and their followers would engage time through theories of knowledge schopenhauer schelling kierkegaard and later heidegger sartre and levinas applied a phenomenological and existential methodology to time but faced a problem of the temporality of human freedom bouton s is the first major work of its kind since bergson s time and free will 1889 and bouton s mystery of the future in which the individual has freedom within the shifting bounds dictated by time charts a new direction
