this book provides a detailed commentary on the classic monograph by alfred tarski and offers a reinterpretation and retranslation of the work using the original polish text and the english and german translations in the original work tarski presents a method for constructing definitions of truth for classical quantificational formal languages furthermore using the defined notion of truth he demonstrates that it is possible to provide intuitively adequate definitions of the semantic notions of definability and denotation and that the notion in a structure can be defined in a way that is analogous to that used to define truth tarski s piece is considered to be one of the major contributions to logic semantics and epistemology in the 20th century however the author points out that some mistakes were introduced into the text when it was translated into german in 1935 as the 1956 english version of the work was translated from the german text those discrepancies were carried over in addition to new mistakes the author has painstakingly compared the three texts sentence by sentence highlighting the inaccurate translations offering explanations as to how they came about and commenting on how they have influenced the content and suggesting a correct interpretation of certain passages furthermore the author thoroughly examines tarski s article offering interpretations and comments on the work

this study looks to the work of tarski s mentors stanislaw lesniewski and tadeusz kotarbinski and
