this book reveals a remarkable oddity about the mainstream philosophy of science while rejecting a noxious relativism it is unable to ascribe truth to scientific theories that also are divorced conceptually from ethics and politics there is much at stake since these dilemmas have led to a politicized truth whereby truth in these areas is often decided ideologically but the ideology and splintered areas collide head on with our awareness of ourselves and the world by relating a world of which we are phenomenologically conscious to a common sense reasoning a novel case is made for objective scientific truth a true causal principle and the principle s implication of a first cause this cause as a creator of nature begets moral norms intrinsic to scientific descriptions of our psycho biological nature since our nature was created as it ought to be affording a naturalistic ethics that can be as true as the science that informs it medicine and its allied sciences are used to illustrate this moral import in terms of a revitalized support of the traditional family a perennial norm expressed by the dictum as the family goes so goes the state thus a state s support of the family exemplifies how normative political claims can be as true as a scientific ethics that informs them the logical link of ethics to science and politics marks the reasoning implicit in a natural theology common to the major monotheistic religions and so despite the faults of all organizations this book suggests one reason why those religions flourished over the ages outlasting the roman empire and modern ideologies that boasted vainly of reigning to the end of history the religions address a personal spirituality and fulfill human nature they render coherent an experienced world where truth coincides in science ethics politics and religion review this book is one of those exceptional works which is both challenging in its philosophical sophistication and edifying in its moral argumentation the review of metaphysics sept 2008 by tom michaud read complete review at link below the review of metaphysics vol 62 245 sep 2008
