this volume offers a comprehensible account of the development and evolution of moral systems it seeks to answer the following questions if morals are eternal and unchanging why have the world's dominant religious moral systems been around for no more than a mere six thousand of the two hundred thousand years of modern human existence what explains the many and varied moral systems across the globe today how can we account for the significant change in moral values in one place in less than 100 years time using examples from classical civilizations the book demonstrates how increasing diversity compromises a

moral system's ability to account for and integrate larger populations into a single social unit this environmental stress is not relieved until a broader more abstract moral system is adopted by a social system this new system provides a sense of belonging and purpose for more people motivating them to engage in prosocial or moral acts and refrain from socially disruptive selfish acts the current human rights paradigm is the world's first universal indigenous moral system because moral systems can be expected to continue to evolve this book points to current boundaries of the human rights paradigm and where the next major moral revolution might emerge

this new and exciting interpretation of the vedas with special reference to asya vamasya sukta rig veda i 164 opens up a wholly novel approach to the understanding of the vedic verses the goal is to decode the richas and to find the true meaning nature and significance of the texts the vedic richas form a code which when properly interpreted reveals a knowledge that may baffle the modern mind it is hoped that more and more scholars will embark on this journey in the near future that will give a boost to vedic studies by coming out of the web of western translations and find the true meaning of the vedas

there is much of human history which we don't know due to lost records the oceans covering our ancestor's cities natural disasters and reasons we don't know there are also many anomalies which have been found showing ruins and objects from the far past which should not exist some of the historical facts this book is based on plato said that atlantis was destroyed 9 000 years before his time in greece plato lived in 433 b c which would have meant atlantis was destroyed 9 433 years b c or 11 433 years before the current age the younger dryas period in history was between roughly 12 900 and 11 600 years ago according to paleontologists and archeologists many researchers think this period of climate change resulted from comets hitting the earth at this time the vulture stone at gobekli tepe which some scientists have interpreted as having a record of comets hitting the earth about 11 000 b c my study on ancient history has led me to write a number of books on the topic which can be found on my website at this link mckettingtonbooks.com/ancient-history.html the above facts and all of my research has led me to conclude that there were ancient world spanning civilizations which existed and were destroyed on the earth in the 9 000 b c to 11 000 b c period there may have been earlier civilizations too but the focus of this book is on that time period the following chapters review some of the evidence of these ancient civilizations which existed at these same very ancient times

i'm fascinated with ancient history because there are continuous new discoveries which push back the dawn of civilization by thousands of years in the last couple of decades the discoveries at gobekli tepe in eastern turkey pushed back man made structures to the time period of 9 000 11 000 b c thousands of years before the next known civilizations existed this book includes my research on ancient sites around the world underground structures giants the destruction of civilization about 10 500 b c the real atlantis and out of place objects which can be millions of years old with this collection of a wide variety of information i

decided that what is needed is a full timeline of intelligent life on earth from millions of years ago to the present there are a lot of gaps in this information but enough records findings and discoveries exist to propose an initial timeline of intelligent life on earth going back hundreds of millions of years yes i m saying intelligent life has existed on earth that long and since humanity and even primates don t exist in those times at all aliens must have lived on the earth at that time there are three parts to this book part one millions of years ago this includes stories of aliens existing on earth in our history and many out of place objects made by intelligent beings and the fossil record which provides supporting evidence that intelligent life did exist at those times part two the unknown civilizations of man here we have evidence of structures built by man but way before any accepted records that civilization or man made constructions existed some of these things may go back 100 000 years ago part three post ice age civilizations this part includes evidence that the younger dryas event was actually comets striking the earth which caused major disasters and probably the destruction of civilizations about 10 500 b c my intention is that this timeline will provide a skeleton of mankind and intelligent life s early history on earth which can be filled in overtime to become much more detailed and prove the truth of this point of view to skeptics worldwide

this generation s chariots of the gods george noory coast to coast am the familiar stories of the book of genesis affirm that god made the universe planet earth and you and me however various anomalies in the text clue us that we are not reading the original version of these stories so what were the original narratives and what did they say about who we are and where we all came from what was the earlier story of human origins almost obliterated from the hebrew scriptures in the 6th century bc and suppressed from christian writing in the 2nd and 3rd centuries ad and what does any of this have to do with extra terrestrials escaping from eden will take you on a journey around the world and into the mythologies of ancient sumeria mesoamerica india africa and greece to reveal a profound secret hidden in plain sight in the text of the bible far reaching and deeply controversial this book points to truths about ourselves the universe and everything that you may have long suspected but not dared to speak

nearly 2 400 years ago ancient philosopher plato wrote the story of atlantis a compelling tale of an 11 000 year old island civilization which has since captivated the imagination of poets authors and the minds of many scholars who over the centuries kept on searching for the legendary island today numerous speculations place atlantis in locations like the azores islands in the middle of the atlantic in spain somewhere off the coast of southeastern cyprus in malta or in more exotic lo

reveals Göbekli Tepe as a center of civilizing knowledge for the ancient world. Details how symbolic elements at Göbekli Tepe link a pre-Vedic cult in India to cosmological myths and traditions in Africa, Egypt, Tibet, and China. Discusses how carved animal images at Göbekli Tepe relate to stages of creation and provide an archaic foundation for symbolic written language. Defines how classical elements of ancient Egyptian myth and religion characterize an archaic cosmological tradition that links ancestrally back to Göbekli Tepe. How could multiple ancient cultures spanning both time and geography have strikingly similar creation myths and cosmologies? Why do the Dogon of Africa and the civilizations of ancient Egypt, India, Tibet, and China share sacred words and symbols, revealing the existence of a long-forgotten primal culture and the world's first center of higher learning? Laird Scranton shows how the sophisticated complex at Göbekli Tepe in Turkey is the definitive point of origin from which all the great civilizations of the past inherited their cosmology, esoteric teachings, and civilizing skills such as agriculture, metallurgy, and stone masonry. Fully developed, Scranton explains how the carved images on Göbekli Tepe's stone pillars were the precursors to the sacred symbols of the Dogon, Egyptians, Tibetans, and Chinese, as well as the matriarchal Sakti cult of ancient Iran and India. He identifies Göbekli Tepe as a remote mountain sanctuary of higher knowledge alluded to in Sakti myth, named like an important temple in Egypt and defined in ancient Buddhist tradition as Vulture Peak. Scranton reveals how Göbekli Tepe's enigmatic carvings and animal symbolism, symbolic of stages of creation, was presented as a kind of prototype of written language accessible to the hunter-gatherers who inhabited the region. He shows how the myths and deities of many ancient cultures are connected linguistically, extending even to the name of Göbekli Tepe and the Egyptian concept of Zep Tepi, the mythical age of the first time. Identifying Göbekli Tepe not only as the first university but also as the first temple, perhaps built as a civilizing exercise, Scranton definitively places this enigmatic archaeological site at the point of origin of civilization, religion, and ancient science.

Unearthed after millennia of being buried beneath the earth, Göbekli Tepe is one of the most important archaeological discoveries of our time. An ancient temple complex that predates the pyramids of Egypt by thousands of years, but what secrets does this enigmatic site hold and why was it built with such intricate precision in an era before agriculture or written language? In Göbekli Tepe: The Resonance of Ancient Frequencies, author Drew Ponder explores the site through the revolutionary lens of frequency wave theory, offering an entirely new understanding of this ancient wonder. In this groundbreaking book, Ponder delves into the possibility that Göbekli Tepe was more than just a ceremonial or religious site; it was a sophisticated instrument for aligning human consciousness with the frequencies of the earth and cosmos. Using a unique blend of archaeology, science, and spiritual insight, Ponder reveals how the site's circular enclosures, towering pillars, and symbolic carvings were designed to harness natural and cosmic energy, allowing the builders to access altered states of consciousness and align themselves with the unseen forces that shape reality. Göbekli Tepe: The Resonance of Ancient Frequencies explores how Göbekli Tepe's architecture may have functioned as a resonant chamber for amplifying natural frequencies, the significance of the animal carvings and geometric symbols as representations of vibrational patterns, and

cosmic forces the site's alignment with celestial bodies and its role as a cosmic conductor for frequency alignment with the stars and planets the use of sound chanting and movement in rituals designed to modulate brainwave frequencies and expand human consciousness the deliberate burial of göbekli tepe as an act of frequency preservation ensuring its spiritual legacy for future generations by reinterpreting göbekli tepe as a center of frequency alignment and consciousness expansion ponder brings ancient knowledge into a modern context inviting readers to consider how these ancient principles can inform our understanding of reality today whether you are fascinated by archaeology intrigued by the mysteries of ancient civilizations or interested in the intersection of science and spirituality göbekli tepe the resonance of ancient frequencies offers a thought provoking journey into the hidden forces that have shaped human history and continue to resonate through time discover the ancient frequencies of göbekli tepe and unlock the secrets of humanity's deep connection to the cosmos
