Business-driven information systems 4e discusses various business initiatives first and how technology supports those initiatives. Second, the premise for this unique approach is that business initiatives should drive technology choices. Every discussion first addresses the business needs and then addresses the technology that supports those needs. This updated edition provides the foundation that will enable students to achieve excellence in business through its updated case studies, closing cases, technology plug-ins, expanded IT topics, and new project management content. Business-driven information systems is designed to give students the ability to understand how information technology can be a point of strength for an organization. And McGraw Hill's online learning and assessment solution, connect mis, helps students apply this knowledge.

Most companies today rely heavily on the use of management information systems (mis) to run various aspects of their businesses. Whether they need to order and ship goods, interact with customers, or conduct other business functions, management information systems are often the underlying infrastructure performing the activities. Management information systems allow companies to remain competitive in today's fast-paced world and especially when conducting business on the internet. Organizations must adapt to technological advances and innovations to keep pace with today's rapidly changing environment. Their competitors certainly will. The purpose of this book is to raise your awareness of the vast opportunities made possible by the tight correlation between business and technology. Business strategies and processes should always drive your

technology choices although awareness of an emerging technology can sometimes lead us in new strategic directions the role of information systems for the most part is to support existing business strategies and processes
