the idea of teachers learning through teaching Itt when presented to a na $\square$ ve bystander appears as an oxymoron supposed to learn before we teach after all under the usual circumstances learning is the task for those who are being taught not

of those who teach however this book is about the learning of teachers not the learning of students it is an ancient wisdom that the best way to truly learn something is to teach it to others nevertheless once a teacher has taught a particular topic or concept and consequently truly learned it what is left for this teacher to learn as evident in this book the experience of teaching presents teachers with an exciting opportunity for learning throughout their entire career this means acquiring a better understanding of what is being taught and moreover learning a variety of new things what these new things may be and how they are learned is addressed in the collection of chapters in this volume It is acknowledged by multiple researchers and mathematics educators in the first chapter leikin and zazkis review literature that recognizes this phenomenon and stress that only a small number of studies attend systematically to It p cesses the authors in this volume purposefully analyze the teaching of mathematics as a source for teachers own learning

this book gathers the most recent developments in fuzzy intelligence systems and real complex systems presented at infus 2020 held in istanbul on july 21 23 2020 the infus conferences are a well established international research forum to advance the foundations and applications of intelligent and fuzzy systems computational intelligence and soft computing highlighting studies on fuzzy intelligence systems and real complex systems at universities and international research institutions covering a range of topics including the theory and applications of fuzzy set extensions such as intuitionistic fuzzy sets hesitant fuzzy sets spherical fuzzy sets and fuzzy decision making machine learning risk assessment heuristics and clustering the book is a valuable resource for academics m sc and ph d students as well as managers and engineers in industry and the service sectors

the concept of home has been changing for more than a century this change began with colonialism and the movement of people across the globe often within a set power dynamic since people now move with greater frequency the question of where home is and what home means is more relevant than ever before meticulously researched transformations of the liminal self addresses the formation of home and identity and the ways in which the latter depends on the former using the postcolonial muslim characters in the literary works of british authors salman rushdie hanif kureishi zadie smith monica ali and fadia faqir author alaa alghamdi shows how home and identity are profoundly impacted by the power dynamics of the colonial relationship the individual immigrants experience and the subjects multicultural setting drawing upon the theoretical work of homi bhabha rosemary

marangoly george gayatri chakrovorty spivak and edward said the conception of home and the formation of hybrid identities is examined and connected to larger cultural manifestations of muslimwestern relationships more specifically alghamdi explores how these characters define their home bold and challenging alghamdis work offers a rigorous and well articulated contribution to the ongoing academic conversation about identity and postcolonial literature
