what room is there for a language of spirituality and the spirit in democratic forms of education this is the question posed in this collection of essays by a broad range of scholars working in education beginning with the premise that postmodernism is associated with a re spiritualization of culture the authors seek to explore ways in which this re spiritualization can be pushed in

democratic rather than rightist or fundamentalist directions what they celebrate is diversity of progressive traditions and discourses of spirituality that educators and other cultural workers can draw upon to inform practice even as they trouble all essentialistic notions of spirituality together these essays move democratic education onto a fundamentally new cultural terrain and they suggest that the metaphor of the journey of the spirit is one of the most enduring and potentially democratic ways of thinking about what it means to teach and to become educated
