a grammar reference book that takes students from the traditional practice of grammar forms through topic based practice exercises

first published in 1998 in this book the author presents the view that although many linguists have been interested in specific indefinites their theories are not quite satisfactory in that they have only tried to explore some aspects of specific indefinites this paper assumes a standard notion of specificity i.e. the notion of someone having in mind an individual or a relation under this assumption there is an attempt to review previous studies on specific indefinites and propose a new theory of specificity which i believe can capture all aspects which the previous studies have explored this leads us to a new information theory which is partially representational and partially denotational and which is useful for dealing with conversational aspects like the distinction between the speaker and the audience
