paul a samuelson was the first american nobel laureate in economics and the second overall he was credited for the scientific work through which he has developed static and dynamic economic theory and actively contributed to raising the level of analysis in economic science that recognition is now thirty years old and samuelson remains at work in the cutting edge of the discipline he is also widely known for a basic textbook that became a landmark learning tool throughout the second half of the twentieth century this excellent collegial appreciation focuses heavily on samuelson s foundations of economic analysis in that work and a series of brief

essays he has contributed to an integration of statics and dynamics by way of the correspondence principle he has also combined the multiplier and accelerator mechanisms in a model of economic fluctuations he has reformed the foundations of consumption theory by his concept of revealed preferences he has developed or improved several major theorems within international trade and created theories of maximum efficiency and maximum growth rate finally he has clarified the role of collective goods in resource allocation in considering the work and life of samuelson editor puttawamaiah has assembled a worthy group of brilliant commentators among the analytic papers in this volume are an essay on the accuracy of economic prediction by l r klein analytical aspects of anti inflation policy by robert m solow a paper by vittorangelo orati on samuelson s linkage to schumpeter and keynes money and price theory by carlo benetti and jean cartelier and a concluding essay on the role of samuelson s economics by michael emmett brady most unusual in works of this kind are some strong critical statements including a pungent examination of vanity as well as creativity in samuelson s work what emerges is a clear picture of a special scholar scholars and students will welcome it alike a result that well fits the purpose and character of samuelson the festschrift has its origins in several issues of the international journal of applied economics and econometrics professor k puttawamaiah has more than three decades of editing journals in economics he is a member of the journal savings and development issued at the university of milan he is author of economic development of karnataka cost benefit analysis and nobel economists lives and contributions

abundant with practical advice and ready to use teaching examples this dynamic guide will help both new and experienced instructors of principles of microeconomics to reconsider and refine their courses mark maier and phil ruder assemble the wisdom of 25 eminent scholars of economic education on how best to introduce students to the discipline and inspire a long lasting passion for microeconomics

this book presents a fascinating story about how academia got it all wrong was it an academic conspiracy was it peculiar social pressures in academia regardless of how it all came about it is time to teach our children financial literacy instead of economics financial literacy is a course that prepares our children for success in today s economic society typical economics courses do nothing to prepare your child for understanding day to day economic responsibility this book presents the reasons to join the battle it is time to stand up and demand relevant education from your state education system

once in a while the world astonishes itself anxious incredulity replaces intellectual torpor and a puzzled public strains its antennae in every possible direction desperately seeking explanations for the causes and nature of what just hit it 2008 was such a moment not only did the financial system collapse and send the real economy into a tailspin but it also revealed the great gulf separating economics from a very real capitalism modern political economics has a single aim to help readers make sense of how 2008 came about and what the post 2008 world has in store the book is divided into two parts the first part delves into every major economic theory from

aristotle to the present with a determination to discover clues of what went wrong in 2008 the main finding is that all economic theory is inherently flawed any system of ideas whose purpose is to describe capitalism in mathematical or engineering terms leads to inevitable logical inconsistency an inherent error that stands between us and a decent grasp of capitalist reality the only scientific truth about capitalism is its radical indeterminacy a condition which makes it impossible to use science's tools e.g. calculus and statistics to second guess it the second part casts an attentive eye on the post war era on the breeding ground of the crash of 2008 it distinguishes between two major post war phases the global plan 1947-1971 and the global minotaur 1971-2008 this dynamic new book delves into every major economic theory and maps out meticulously the trajectory that global capitalism followed from post war almost centrally planned stability to designed disintegration in the 1970s to an intentional magnification of unsustainable imbalances in the 1980s and finally to the most spectacular privatisation of money in the 1990s and beyond modern political economics is essential reading for economics students and anyone seeking a better understanding of the 2008 economic crash

paolo favilli provides both students and scholars with an original reading of themes and issues found in karl marx's *das kapital* and its connections with present day challenges by way of continuous cross referencing between present and past favilli demonstrates claims that the scientific status of *das kapital* advanced by countless texts since its original publication are themselves deeply imbued by the spirit of the times if in 1963 jean paul sartre could write that marxism was the unsurpassable philosophical horizon of our times what could make an undergraduate student today consider such a claim plausible informed by the latest research on marxist theory and decades teaching the philosophy of history favilli employs a didactic approach stimulating student engagement and learning opportunities in the classroom this approach allows for a better understanding of relationship between the present and the multiple temporalities that characterise and periodise the contemporary era what follows is a critique of the contemporary academy for its hangover of post 1989 *nuovismo* cult of novelty and inability to make the proper distinctions between marxism as party state the works of karl marx and marxism as an object of history this led to the spectacle where after 1989 those who had spent most of their careers as marxist hued scholars not only abandoned this identity but also spurned any recognition that marx and marxism were worthwhile objects of inquiry this book was first published in italian as *a proposito de il capitale il lungo presente e i miei studenti* corso di storia contemporanea milan francoangeli 2021 this english translation includes a new foreword by the author
