with the emergence of clinical neuropsychology as one of the fastest growing specialties in psychology comes the need for current and future practitioners to stay abreast of the most recent research a number of professional journals more than adequately meet this need but there is also

a need to stay up to date on the current thinking about important problems drawing upon the expertise of leaders in the field the editors intent in this book was to provide the practitioner with a source for discussions of topics that are vital to their ongoing development as clinical neuropsychologists but that generally are not addressed in the literature to any great degree

this study reviews the literature on the contribution of low inflation to economic growth and the subsequent widespread adoption of inflation targeting as a monetary policy framework edwin truman addresses the challenges and risks associated with such a framework building on these foundations the study focuses on two major international economic policy issues 1 the implications of differing national regimes of inflation targeting for international economic policy cooperation and 2 the adoption of inflation targeting by emerging market economies which often lack stable monetary policy environments and credible policy authorities a situation which among other things can complicate the use of the inflation targeting framework as the basis for imf supported stabilization programs
