paolo favilli provides both students and scholars with an original reading of themes and issues

found in karl marx's *Das Kapital* and its connections with present day challenges by way of continuous cross referencing between present and past favilli demonstrates claims that the scientific status of *Das Kapital* advanced by countless texts since its original publication are themselves deeply imbued by the spirit of the times if in 1963 jean paul sartre could write that marxism was the unsurpassable philosophical horizon of our times what could make an undergraduate student today consider such a claim plausible informed by the latest research on marxist theory and decades teaching the philosophy of history favilli employs a didactic approach stimulating student engagement and learning opportunities in the classroom this approach allows for a better understanding of relationship between the present and the multiple temporalities that characterise and periodise the contemporary era what follows is a critique of the contemporary academy for its hangover of post 1989 *nuovismo* cult of novelty and inability to make the proper distinctions between marxism as party state the works of karl marx and marxism as an object of history this led to the spectacle where after 1989 those who had spent most of their careers as marxist hued scholars not only abandoned this identity but also spurned any recognition that marx and marxism were worthwhile objects of inquiry this book was first published in italian as *a proposito de il capitale il lungo presente e i miei studenti* corso di storia contemporanea milan francoangeli 2021 this english translation includes a new foreword by the author

once in a while the world astonishes itself anxious incredulity replaces intellectual torpor and a puzzled public strains its antennae in every possible direction desperately seeking explanations for the causes and nature of what just hit it 2008 was such a moment not only did the financial system collapse and send the real economy into a tailspin but it also revealed the great gulf separating economics from a very real capitalism modern political economics has a single aim to help readers make sense of how 2008 came about and what the post 2008 world has in store the book is divided into two parts the first part delves into every major economic theory from aristotle to the present with a determination to discover clues of what went wrong in 2008 the main finding is that all economic theory is inherently flawed any system of ideas whose purpose is to describe capitalism in mathematical or engineering terms leads to inevitable logical inconsistency an inherent error that stands between us and a decent grasp of capitalist reality the only scientific truth about capitalism is its radical indeterminacy a condition which makes it impossible to use science's tools e.g. calculus and statistics to second guess it the second part casts an attentive eye on the post war era on the breeding ground of the crash of 2008 it distinguishes between two major post war phases the global plan 1947 1971 and the global minotaur 1971 2008 this dynamic new

book delves into every major economic theory and maps out meticulously the trajectory that global capitalism followed from post war almost centrally planned stability to designed disintegration in the 1970s to an intentional magnification of unsustainable imbalances in the 1980s and finally to the most spectacular privatisation of money in the 1990s and beyond modern political economics is essential reading for economics students and anyone seeking a better understanding of the 2008 economic crash
