lucien febvre s magisterial study of sixteenth century religious and intellectual history published in 1942 is at long last available in english in a translation that does it full justice the book is a modern classic febvre founder with marc bloch of the journal annales was one of france s leading historians a scholar whose field of expertise was the sixteenth century this book written late in his career is regarded as his masterpiece despite the subtitle it is not primarily a study of rabelais it is a study of the mental life the mentalité of a whole age febvre worked on the book for ten years his purpose at first was polemical he set out to demolish the notion that rabelais was a covert atheist a freethinker ahead of his time to expose the anachronism of that view he proceeded to a close examination of the ideas information beliefs and values of rabelais and his contemporaries he combed archives and local records compendia of popular lore the work of writers from luther and erasmus to ronsard the verses of obscure neo latin

poets everything was grist for his mill books about comets medical texts philological treatises even music and architecture the result is a work of extraordinary richness of texture enlivened by a wealth of concrete details a compelling intellectual portrait of the period by a historian of rare insight great intelligence and vast learning febvre wrote with gallic flair his style is informal often witty at times combative and colorful almost to a fault his idiosyncrasies of syntax and vocabulary have defeated many who have tried to read let alone translate the french text beatrice gottlieb has succeeded in rendering his prose accurately and readably conveying a sense of febvre s strong often argumentative personality as well as his brilliantly intuitive feeling for renaissance france

most of the prefatory issues are extensively elaborated upon in the prolegomenon which also contains the complete references to the texts and authors discussed below nevertheless the preface would be grossly incomplete without touching on some of these issues books and scholars too many of this book s chapters e g mora s marx s d b weiner s examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in german french italian and spanish

also in his 1968 short history of psychiatry discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German such citations will of course not be repeated here finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well see Prolegomenon for references to these splendid series in a rough and ready sense medical history began in classical Greece for example on ancient medicine while traditionally included in the Hippocratic Corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor moreover the Hippocratic and other schools were hardly as secular as we now suppose on epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease
