this paper investigates the efficiency of the japanese distribution system measured by the distribution margin most of the discussions on the japanese distribution system have so far relied on institutional descriptions and anecdotal evidence failing to substantiate the case the present paper will show that the japanese and u s distribution sectors are about the same in terms of value added and distribution margins therefore it is not true that the distribution sector adds up unnecessary distribution costs or earns monopolistic operating profits this paper will not address a question whether the distribution system is acting as a non tariff barrier thus even if the distribution sector in japan is judged to be efficient it leaves open a possibility that the distribution system works as a barrier to potential new entrants from both home and foreign manufacturers

abstract this paper is a recap of g3 exchange rate relationships since the collapse of bretton woods and an analysis of recent proposals for changing the way the g3 countries currently conduct exchange rate policy we seek to understand these proposals in the context of the status quo monetary policies and intervention arrangements that are likely to be pursued by the g3 central banks in the absence of any formal arrangements among their governments to limit exchange rate volatility the advocates of the proposals for change have made their assessment of the global costs of exchange rate volatility and their estimates of exchange rate misalignments especially as these apply to the emerging economies through their linkages to the global capital markets in their view the status quo is unacceptable and a sustained effort to limit g3

exchange rate fluctuations would deliver benefits to the world economy that would outweigh the value that they place on any loss of monetary autonomy in the g3 that would be required to maintain such a system the skeptics make a positive not a normative judgment that the sorts of proposals that are on the table will not in practice get around the impossible trinity of international finance
