in this second volume of main currents of sociological thought raymond aron continues the analysis begun in the first volume of the great doctrines of historical sociol ogy aron explores the work of three figures who profoundly shaped sociology as it entered the twentieth century emile durkheim the great french theorist of consensus who continued auguste comte s quest for a science of society and a scientific validation of morality vilfredo pareto the italian neo machiavellian who mocked traditional mo rality and humanitarian pretensions and emphasized the oligarchic or elitist character of all societies and the german sociologist max weber who reflected continuously on the relationship between science and action filled with deep foreboding about the pros pects for human freedom in an age marked by bureaucratization and rationalization aron presents rich portraits of these three thinkers drawing from them what remains of enduring worth even as he distances himself from durkheim s project for a science of society pareto s exaggerated critique

of humanitarianism and weber's tragic pessimism aron's book is essential for clarifying his profound indebtedness to and crucial divergences from the thought of max weber the sociologist par excellence in aron's view together with volume 1 which treats the work of montesquieu comte marx and toqueville it forms the definitive survey of the great social thinkers to date yet as daniel j mahoney and brian c anderson explain in their introduction main currents is more than a survey it is above all a challenge to contemporary social science to retain the ambition of an older philosophically informed sociology to present an interpretation of modern society and to reflect on the meaning of universal history

this is the first of raymond aron's magisterial two volume treatment of the sociological tradition perhaps the definitive work of its kind the second volume treating durkheim pareto and weber is scheduled to appear in spring 1998 more than a work of reconstruction aron's study is at its deepest level an engagement with the question of modernity what constitutes the essence of the new modern order that having emerged in the eighteenth century still forms the categories of our experience sweeping us along toward an unknown destination with his usual scrupulous fairness aron looks to the major social thinkers to discern how they answered this pressing question volume 1 explores three traditions the french liberal school of political sociology represented by montesquieu and toqueville the comtean tradition anticipating durkheim in its deemphasis of the political and its elevation of social unity and consensus and the marxists who posited the struggle between classes and placed their faith in historical necessity a foreword by the eminent french philosopher pierre manent highlights main currents as a unique contribution to political philosophy as well as the history of sociological thought while daniel j mahoney and brian c anderson provide an introduction situating main currents within the corpus of aron's work as a whole this work is essential reading for philosophers historians sociologists and political scientists

this is the first part of raymond aron's landmark two volume study of the sociological tradition arguably the definitive work of its kind more than a work of reconstruction aron's study is at its deepest level an engagement with the very question of modernity how did the intellectual currents which emerged in the eighteenth century shape the modern political and philosophical order with scrupulous fairness aron examines the thoughts and arguments of the major social thinkers to discern how they answered this question volume one explores three traditions the french liberal school of political sociology represented by montesquieu and toqueville the comtean tradition anticipating durkheim in its elevation of social unity and consensus and the marxists who posited the struggle between classes and placed their faith in historical necessity in his customary clear and penetrating prose aron argues that each of these schools offers its own theory of the diversity of societies and that each is inspired both by moral convictions and by scientific hypotheses this routledge classics edition includes an introduction by daniel j mahoney and brian c anderson

the second volume of the landmark study examining the work of sociology's defining thinkers from the turn of the nineteenth century to the interwar period main currents in sociological thought remains a foundational synthesis in the field in this second and final volume of his classic survey raymond aron explores the work of three figures who profoundly shaped sociology as it entered the twentieth century durkheim who continued comte's quest for a science of society and a scientific validation of morality pareto the italian neo machiavellian who emphasized the elitist character of all societies and weber the german sociologist who reflected critically on the prospects for human freedom in an age of disenchantment bringing together penetrating intellectual portraits of these great

thinkers and close readings of their most consequential texts main currents in sociological thought highlights the historical and intellectual context within which each man wrote and draws out their works enduring insights and influence in the field today
