innovative algorithms and techniques in automation industrial electronics and telecommunications includes a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of industrial electronics technology automation telecommunications and networking innovative algorithms and techniques in automation industrial electronics and telecommunications includes selected papers form the conference proceedings of the international conference on industrial electronics technology automation ieta 2006 and international conference on telecommunications and networking tene 06 which were part of the international joint conferences on computer information and systems sciences and engineering cisse 2006 all aspects of the conference were managed on line not only the reviewing submissions and registration processes but also the actual conference conference participants authors presenters and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground breaking conference the

on line structure of this high quality event allowed academic professionals and industry participants to contribute work and attend world class technical presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time out of the office suffice to say that cisse received submissions from more than 70 countries for whose researchers this opportunity presented a much more affordable dynamic and well planned event to attend and submit their work to versus a classic on the ground conference the cisse conference audio room provided superb audio even over low speed internet connections the ability to display powerpoint presentations and cross platform compatibility the conferencing software runs on windows mac and any other operating system that supports java in addition the conferencing system allowed for an unlimited number of participants which in turn granted cisse the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session

principles of electron optics applied geometrical optics second edition gives detailed information about the many optical elements that use the theory presented in volume 1 electrostatic and magnetic lenses quadrupoles cathode lens based instruments including the new ultrafast microscopes low energy electron microscopes and photoemission electron microscopes and the mirrors found in their systems wien filters and deflectors the chapter on aberration correction is largely new the long section on electron guns describes recent theories and covers multi column systems and carbon nanotube emitters monochromators are included in the section on curved axis systems the lists of references include many articles that will enable the reader to go deeper into the subjects discussed in the text the book is intended for postgraduate students and teachers in physics and electron optics as well as researchers and scientists in academia and industry working in the field of electron optics electron and ion microscopy and nanolithography offers a fully revised and expanded new edition based on the latest research developments in electron optics written by the top experts in the field covers every significant advance in electron optics since the subject originated contains exceptionally complete and carefully selected references and notes serves both as a reference and text

this book contains the contributions to the second european conference on unsaturated soils e unsat 2012 held in napoli italy in june 2012 and includes more than one hundred papers addressing three thematic areas experimental modelling and engineering

principles of electron optics second edition advanced wave optics provides a self contained modern account of electron optical phenomena with the dirac or schrödinger equation as a starting point knowledge of this branch of the subject is essential to understanding electron propagation in electron microscopes electron holography and coherence sections in this new release include electron interactions in thin specimens digital image processing acquisition sampling and coding enhancement linear restoration nonlinear restoration the phase problem three dimensional reconstruction image analysis instrument control vortex beams the quantum electron microscope and much more includes authoritative coverage of many recent developments in wave electron optics describes the interaction of electrons with solids and the information that can be obtained from electron beam techniques includes new content on multislice optics 3d reconstruction wigner optics vortex beams and the quantum electron microscope

unsaturated soils research and applications contains 247 papers presented at 6th international conference on unsaturated soils unsat2014 sydney australia 2 4 july 2014 the two volumes provide an overview of recent experimental and theoretical advances in a wide variety of topics related to unsaturated soil mechanics unsaturated soil behavior experimentation modelling case histories geotechnical engineering problems multidisciplinary and new areas unsaturated soils research and applications presents a wealth of information and is of interest to researchers and practising engineers in soil mechanics and geotechnical engineering these proceedings are dedicated to professor geoffrey e blight 1934 2013 who passed in november 2013
