making a decision of any importance is never simple on the one hand specialists in decision theory do not come within the reach of most policy makers and secondly there are very few books on pragmatic decision that are not purely anecdotal in addition there is virtually no book that provides a link between decision making and action this book provides a bridge between the latest results in artificial intelligence neurobiology psychology and decision making for action what is the role of intuition or emotion what are the main psychological biases of which we must be wary how can we avoid being manipulated what is the proper use of planning how can we remain rational even if one is not an expert in probabilities perhaps more importantly for managers how does one go from decision to action so many questions fundamental to the practice of decision making are addressed this book dissects all issues that arise almost daily for decision makers at least for major decisions drawing on numerous examples this book answers in plain language and imagery all your questions the final chapter takes the form of a brief reminder everything you have to remember to be a good decision maker

the insights offered in this book are intended to guarantee the reader a more successful career it is written especially for managers and executives whose jobs

require managing people successfully but it is also written for anyone who must make decisions that involve other people the authors discuss the decision styles and habits that people form and how to change decision making habits where necessary the models and techniques for decision making presented here have been used throughout the world in all kinds of businesses and government agencies decision style concepts can benefit anyone from a new management trainee or mba student to the ceo of a large firm

today s world is complex and getting more so each day huge multinational corporations international crisis and fast breaking events require most people to make decisions on a daily basis without the tools to understand the long term impact that today s decision might create because most people have never really been trained in how to make important complex decisions most people rely on experience and gut reaction which is okay for many decisions but not okay for decision that will have meaningful impact on organizations and individual decision makers need to develop the art and science of strategic decision making here professor thomas martin explains the need for decision makers to modify their thinking about how they deal with acquiring and analyzing information in each of the decision making process steps this approach requiring thinking modification will lengthen the process make it more complex and to some more arduous but the comprehensiveness of the new thinking approach should lead to improved and more effective decision making in this book dr martin presents a thinking modification framework that asserts that in the decision making process there are three situational states a current state future state and a transitional state that one must deliberate in finding a solution for each of these situational states martin develops an identical five step process to determine the best decision to make the steps of this process include change needing situational analysis challenge framing causal analysis generating solution ideas choosing a solution set implementation and aftermath planning this book will appeal to decision makers leaders and students of management who want a specific framework that details the process behind making strategic well informed decisions

describes the quantitative and qualitative methods that can help decision makers to structure and clarify difficult problems and to explore the implications of pursuing different options this book examines models and decision making in health care methods for clarifying complex decisions methods for service planning and resource allocation and modelling for evaluating changes in systems

have you ever experienced a decision situation that was hard to come to grips with did you ever feel a need to improve your decision making skills is this something where you feel that you have not learned enough practical and useful methods in that case you are not alone even though decision making is both considered and actually is a very important skill in modern work life as well as in private life these skills are not to any reasonable extent taught in schools at any level no wonder many people do indeed feel the need to improve but have a hard time finding out how this book is an attempt to remedy this shortcoming of our educational systems and possibly also of our common partly intuition based decision culture intuition is not at all bad quite the contrary but it has to co exist with rationality we will show you how methods for decision making should be of prime concern to any individual or organisation even if the decision processes are not always explicitly or even consciously formulated all kinds of organisations as well as individuals must continuously make decisions of the most varied nature in order to prosper and

attain their objectives a large part of the time spent in any organisation not least at management levels is spent gathering processing and compiling information for the purpose of making decisions supported by that information the same interest has hitherto not been shown for individual decision making even though large gains would also be obtained at a personal level if important personal decisions were better deliberated this book aims at changing that and thus attends to both categories of decision makers this book will take you through a journey starting with some history of decision making and analysis and then go through easy to learn ways of structuring decision information and methods for analysing the decision situations beginning with simple decision situations and then moving on to progressively harder ones but never losing sight of the overarching goal that the reader should be able to follow the progression and being able to carry out similar decision analyses in real life situations the open access version of this book available at taylorfrancis.com has been made available under a creative commons attribution non commercial no derivatives 4 0 license
