the impetus for the conference that was the basis for this volume emanated from the influence of two brilliant

minds of Egon Sohmen and Adam Klug who both died at an early age leaving their families and the professions of economics and economic history with major voids. In the course of research on the origins of open economy macroeconomics, the significant contributions of Egon Sohmen came to the fore after correspondence with some of those involved in the early development of the open economy macro-model. We turned to Adam Klug for his views on the matter as he had dealt with the history of intertemporal trade models in his Ph.D. thesis and it was Adam who suggested the idea of a conference bringing together economists and economic historians. At this point, we want to acknowledge the very generous grant from the Egon Sohmen Foundation and the active participation of Dr. Helmut Sohmen and Mrs. Renee Sohmen at the conference. We also want to thank Prof. Sir Aaron Klug, Nobel Laureate, and the Klug family for their support and the financial contribution of the Adam Klug Memorial Lecture Fund at Ben-Gurion University. Other institutions that contributed to the conference were the Gianni Foundation, Bank of Israel, University of North Carolina, Department of Economics, Faculty of Social Science, and Aharon Meir Center for Banking, Bar Ilan University, Department of Economics and Faculty of Social Science, Ben-Gurion University of the Negev.

Introduction to International Economics, 2nd edition, has been revised and updated to deliver the most current information on today's global economy for a one-semester course. Renowned educator and author Dominick Salvatore provides a clear presentation with several case studies per chapter to make difficult economic principles easy to understand in a real-world context by covering the topics essential to an understanding of the global economy. This text is easily accessible for economics, business, and political science majors alike. For any international economics course, Salvatore's 2nd edition takes the student's understanding of economics well beyond the classroom and across the globe.

Competition authorities are increasingly interested in understanding the impact of their activities on markets and consumers. The goal is to improve competition policy rules and decision-making practices and to get robust evidence on the benefits of competition and competition policy for society as a whole. Discussions with competition authorities, practitioners, and academics have shown the need to take stock of the experience gained in this field by the European Commission and to present it in an easily accessible way. The studies collected in this volume, prepared by senior Commission officials and competition policy experts, range from the ex post evaluation of specific policy interventions to the assessment of the broader impact of competition policy. The issues and topics examined include the following: objectives and scope of evaluations by the European Commission; description of counterfactual evaluation techniques used; conditions for a successful ex post evaluation of a competition policy intervention; a wide selection of individual cases covering a variety of economic sectors; applications in merger control, antitrust, and state aid; direct benefits of competition policy interventions for consumers; deterrent effects of such interventions on market participants and macroeconomic outcomes in terms of job creation, productivity, and GDP growth. This matchless book assembles within a single volume all that is needed for competition policy analysts and practitioners to undertake ex post economic evaluations. While its collection of state-of-the-art ex post evaluation studies has a clear value for competition authorities, it is sure to be welcomed as well by competition law practitioners in the private sector who will greatly appreciate the effort made to cast a critical eye on decisions taken in the past. Moreover, it allows for addressing some of the new challenges facing competition policymakers. Fabienne Ilzkovitz is principal advisor responsible for the economic evaluation of competition policy within the Directorate General for Competition of the European Commission and since 2014 she has coordinated various ex post evaluation projects in the Directorate General. She is also associate professor of economics in the Solvay Brussels School of Economics and Management at the Université libre de Bruxelles, Belgium. Adriaan Dierx is senior expert on ex post economic evaluation within the Directorate General for Competition of the European Commission. He has managed a number of studies aimed at assessing the economic impact of the European Commission's competition policy interventions.

This book argues that the trade-distorting effects of advantages associated with SOEs are more severe from an economic perspective and the behavior of SOEs after receiving advantages is of more concern compared to

private owned enterprises poses the premise is that the existence of soes per se is not the essential problem rather the underlying problems are i the disproportionate granting of advantages to soes compared to poes and ii the behavior of soes once they receive advantages the book offers a systematic analysis focusing on the various advantages granted to soes and their subsequent behavior its detailed analysis reveals the inadequacy of current wto rules and is complemented by a number of concrete proposals
