this outstanding collection of original essays brings together some of the leading experts

in competition economics policy and law they examine what lies at the core of the economic approach to competition law and deal with its normative and institutional limitations in recent years the more economic approach has led to a modernisation of competition law throughout the world this book comprehensively examines for the first time the foundations and limitations of the approach and will be of great interest to scholars of competition policy no matter what discipline competition policy and the economic approach will appeal to academics in competition economics and law policy makers and practitioners in the field of antitrust competition law as well as postgraduate students in competition law and economics those interested in the interplay of law and economics in the field of competition will also find this book invaluable

modelling european mergers presents a comprehensive and fresh perspective on the economic analysis of mergers by leading academics and competition policymakers from europe and the us the book frankly discusses the pros and cons of using applied game theory models in merger control from a historical and theoretical perspective seven case studies on the actual use of advanced techniques and models in legal procedures provide a perspective from the national competition authorities in belgium denmark italy the netherlands and sweden on markets that range from basic goods such as bread and aperitifs to complex products such as electricity literature and software the case studies provide many insights into practical issues such as data collection procedures and errors of predication as well as in the relative merits of different econometric approaches a recurring theme of the book is how economic insights can be translated into convincing legal decisions

this book combines practical guidance and theoretical background for analysts using empirical techniques in competition and antitrust investigations peter davis and eliana garcés show how to integrate empirical methods economic theory and broad evidence about industry in order to provide high quality robust empirical work that is tailored to the nature and quality of data available and that can withstand expert and judicial scrutiny davis and garcés describe the toolbox of empirical techniques currently available explain how to establish the weight of pieces of empirical work and make some new theoretical

contributions the book consistently evaluates empirical techniques in light of the challenge faced by competition analysts and academics to provide evidence that can stand up to the review of experts and judges the book's integrated approach will help analysts clarify the assumptions underlying pieces of empirical work evaluate those assumptions in light of industry knowledge and guide future work aimed at understanding whether the assumptions are valid throughout davis and garcés work to expand the common ground between practitioners and academics

this is the first book to provide a systematic treatment of the economics of antitrust or competition policy in a global context it draws on the literature of industrial organisation and on original analyses to deal with such important issues as cartels joint ventures mergers vertical contracts predatory pricing exclusionary practices and price discrimination and to formulate policy implications on these issues the interaction between theory and practice is one of the main features of the book which contains frequent references to competition policy cases and a few fully developed case studies the treatment is written to appeal to practitioners and students to lawyers and economists it is not only a textbook in economics for first year graduate or advanced undergraduate courses but also a book for all those who wish to understand competition issues in a clear and rigorous way exercises and some solved problems are provided

impact assessment ia is introduced in this book with a guide to the process scope content and management of ia for the governments of developing economies in doing so evidence based policy making is taken into full consideration after the principles of ia are set forth its procedures are described illustrated by typical cases from the united states and japan then an explanation follows of the components of ia such as necessity alternatives and assessment of cost and benefit with a description of competition assessment in developing economies it is not effective to simply import a system from developed countries directly into developing countries especially for economic regulation and in consideration of compliance and competition issues thus the book provides recommendations on how to appropriately modify developed countries systems for countries that are still developing the book concludes by taking up several issues surrounding ia especially nudge theory and

public involvement

this book addresses the phenomenon of mergers that may result in non coordinated effects in oligopolistic markets such cases are sometimes referred to as non collusive oligopolies or gap cases and there is a concern that they might not be covered by the substantive test that some member states use for merger assessment ioannis kokkoris examines the argument that the european community merger regulation regulation 4064 89 did not capture gap cases and considers the extent to which the revised substantive test in regulation 139 2004 deals with the problem of non collusive oligopolies the author identifies actual examples of mergers that gave rise to a problem of non coordinated effects in oligopolistic markets both in the eu and in other jurisdictions and analyses the way in which these cases were dealt with in practice the book considers legal systems such as united kingdom united states australia and new zealand the book investigates whether there is any difference in the assessment of non collusive oligopolies between the various substantive tests which have been adopted for merger assessment in various jurisdictions the book also looks at the various methodological tools available to assist competition authorities and the professional advisers of merging firms to identify whether a particular merger might give rise to anticompetitive effects and explores the type of market structure in which a merger is likely to lead to non coordinated effects in oligopolistic markets
