the sixth title in the bestselling collins guide series this book covers the fungi of the british isles with considerable relevance for europe and the wider temperate world

this publication sets out a preliminary set of indicators of sustainable development to help us understand how the environment and economy are changing it also looks at how economic growth and the protection of the environment can be reconciled

the research agency of the forestry commission

conference proceedings which considers ecosystems as diverse in location and scale as the mediterranean hedgerows galapagos the antarctic roadside verges and bermuda this book illustrates the profound impact that the transport of people has on the environment the work also discusses topics such as the fragmentation of habitats and pollution

in the early 16th century weobley was described as a market town in herefordshire where is a goodly castell but somewhat in decay less than a century later and based on a plan made by silas taylor all that remained of the castle were a few walls a

series of robbed construction trenches and maybe two substantial timber framed buildings referred to by Taylor as dwellings. Anciently as time passed the history of the castle was lost, albeit temporarily. Between 2001 and 2004 a project to uncover many unsolved questions concerning the origins, use and demise of the castle was undertaken by a multi-disciplinary team led by the editors of this volume. The project, funded by the local heritage initiative and supported by volunteers, undertook a series of non-intrusive investigations as well as detailed studies into the history and development of this once medieval town. Following the results of the surveys, strategic trenching was located in various locations in and around the castle. From this excavation was found an array of objects such as medieval pottery, coinage and metalwork, along with significant structures including the foundations of a number of medieval buildings. Looking beyond the castle walls, this provides a detailed account of the methodology of each of the survey and excavation programmes that assisted in the unravelling of some of the answers to this most complex of histories.

Cumbria or the habitat of Cumberland, Westmorland and Lancashire north of the sands is the Lakeland area treated by author Derek Ratcliffe in this latest volume in the new Naturalist series.
