economic sanctions are instruments of foreign policy however they can also affect legal relations between private parties principally in contract in such cases the court or arbitration tribunal seized must decide whether to give effect to the economic sanction in question private international law functions as a filter transmitting economic sanctions that originate in public law to the realm of private law the aim of this book is to examine how private international law rules can influence the enforcement of economic sanctions and their related foreign policy objectives a coherent eu foreign policy position in addition to promoting legal certainty and predictability would presuppose a uniform approach not only concerning the economic sanctions of the eu but also with regard to the restrictive measures imposed by third countries however if we examine in detail the application of economic sanctions by member states courts and arbitral tribunals we find a somewhat different picture this book argues that this can be explained in part by the divergence of private international law approaches in the member states

the post industrial revolution has changed global economic and environmental conditions globalization has helped to boost resource productivity and accelerated individual nations economic development and levels of connectedness to one another the one belt one road obor initiative for example is an ambitious economic growth and business venture aimed at increasing the integration of various countries across africa asia and europe the chinese authorities term it the century project as obor stretches around 78 nations globally the china pakistan economic corridor cpec is another example of economic integration emphasizing connections to africa and west asia as economic markets it remains apparent that economic growth and energy sources mainly fossil fuels are the primary drivers of climate change however only a limited fraction of initiatives have been taken to convert such energy systems to carbon neutral sources economic integration extension without green corridors raises doubts on the effectiveness and productivity of various international conferences and summits in this regard

purdue university has played a leading role in providing the engineers who designed built tested and flew the many aircraft and spacecraft that so changed human progress during the 20th century it is estimated that purdue has awarded 6 of all bs degrees in aerospace engineering and 7 of all phds in the united states during the past 65 years the university s alumni have led significant advances in research and development of aerospace technology have headed major aerospace corporations and government agencies and have established an amazing record for exploration of space more than one third of all us manned space flights have had at least one crew member who was a purdue engineering graduate including the first and last men to step foot on the moon the school of aeronautics astronautics was founded as a separate school within the college of engineering at purdue university in 1945 the first edition of this book was published in 1995 at the time of the school s 50th anniversary this corrected and expanded second edition brings the school s illustrious history up to date and looks to purdue s future in the sky and in space
