Reflection questions prompt you to engage personally with the work's messages, connecting them to modern life. Hand-picked memorable quotes shine a spotlight on moments of literary brilliance. Interactive footnotes clarify unusual references, historical allusions, and archaic phrases for an effortless, more informed read.

This book is about forming effective critiques of neoclassical economics. It begins with what Alfred Marshall called the principles of economics and concludes that there is still much that can be done to make neoclassical economics more realistic.

The text seeks to teach introductory students core economic concepts, the essence of economics, without overwhelming them with details. Principles of economics presents the material in an intuitive way that avoids excessive maths. The authors introduce a short list of core principles, reinforce them by illustrating and applying each principle in several contexts, and then ask students to work exercises to see what they've learned. The text seeks to create economic naturalists. That is, after reading the text, students will ask and answer questions about their economic environment. For example, students will see braille dots on drive-up ATMs and ask why they're there. Peppered with such examples, Frank and Bernanke not only engage students but teach them to see each feature of their economic landscape as the reflection of an implicit or explicit cost-benefit calculation.

When people should go to the ebook stores, search foundation by shop, shelf by shelf, it is in reality problematic. This is why we allow the book compilations in this website.
