an alternative history of bicycles and motorcycles two wheeled transportation and material culture accounts for the nineteenth century creation and development of two wheeled vehicles both human powered and motorized specifically the book focuses on the period from 1885 which saw the appearance simultaneously of the safety bicycle and the einspur the first motorcycle to 1920 while exploring implications for later bicycling and motorcycling we argue that invention of these vehicles rather than the product of gifted individuals should be seen as the consequence of a number of historical economic cultural and political forces that intersect so unpredictably that the notion of a genius inventor is reductive the common evolutionary model of development from the bicycle to the motorcycle oversimplifies both the technology and its origins stripping the vehicles of all their material and cultural associations such a model fails to advance our understanding of the devices their creators and their riders taking a contemporary vehicle and tracing its lineage creates a false sense of evolutionary necessity in its creation and fails to account for the many possible developmental paths that were for whatever reason abandoned by contrast our book adopts a material culture approach a form of inquiry that stresses the connections between artifacts and social relations we consider not simply the bicycle and motorcycle as material objects but focus also on the complex socio political and

economic convergences that produced the materials materials that in turn themselves shaped the vehicles appearance function and adoption by riders

american motorcyclist magazine the official journal of the american motorcyclist associaton tells the stories of the people who make motorcycling the sport that it is it s available monthly to ama members become a part of the largest most diverse and most enthusiastic group of riders in the country by visiting our website or calling 800 ama join

los angeles magazine is a regional magazine of national stature our combination of award winning feature writing investigative reporting service journalism and design covers the people lifestyle culture entertainment fashion art and architecture and news that define southern california started in the spring of 1961 los angeles magazine has been addressing the needs and interests of our region for 48 years the magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely southern californian

beginning in 1881 isolated prototypes of electric tricycles and bicycles were patented and sometimes tested limited editions followed in the 1940s but it was not until the lithium ion battery became available in the first decade of this century that urban pedelecs and more powerful open road motorcycles sometimes with speeds of over 200 mph became possible and increasingly popular today s ever growing fleets of one wheel two wheel and three wheel light electric vehicles can now be counted in the hundreds of millions in this third installment of his electric transport history series the author covers the lives of the innovative engineers who have developed these e wheelers
