students and residents with the most commonly encountered topics in the academic and professional lifestyle teaching them all of the practical nuances that are often only learned through experience written by a team of experienced professionals to help guide younger researchers a guide to the scientific career virtues communication research and academic writing features ten sections composed of seventy four chapters that cover qualities of research scientists career satisfaction and its determinants publishing in academic medicine assessing a researcher's scientific productivity and scholarly impact manners in academics communication skills essence of collaborative research dealing with manipulative people writing and scientific misconduct ethical and legal aspects plagiarism research regulations proposals grants and practice publication and resources tips on writing every type of paper and report and much more an easy to read source of essential tips and skills for scientific research emphasizes good communication skills sound clinical judgment knowledge of research methodology and good writing skills offers comprehensive guidelines that address every aspect of the medical student resident academic and professional lifestyle combines elements of a career management guide and publication guide in one comprehensive reference source includes selected personal stories by great researchers fascinating writers inspiring mentors and extraordinary clinicians scientists a guide to the scientific career virtues communication research and academic writing is an excellent interdisciplinary text that will appeal to all medical students and scientists who seek to improve their writing and communication skills in order to make the most of their chosen career

introduces research principles including hypothesis formulation data collection and analysis covers experimental and non experimental methods for scientific inquiry

is journal impact factor a good measure of research merit this question has assumed a great importance after the notification of the university grants commission minimum qualifications for appointment of teachers and other academic staff in universities and colleges and measures for the maintenance of standards in higher education regulations 2009 on september 23rd 2009 now publication of research papers articles in reputed journals has become an important factor in assessment of the academic performance of teachers in colleges and universities in india one of the measures of reputation and academic standard rank or importance of a journal is the so called impact factor this study makes a detailed statistical analysis of journal impact factors across the disciplines it finds that if journal impact factor is used to assess the academic performance of individuals for the purpose of selection promotion etc and it is not borne in mind that due to vast differences in the nature of distribution of impact factors across the disciplines they are not justifiably comparable a below average scholar in the one discipline will rank higher and will be honored and benefitted more than another scholar in some other discipline wherein the journal impact factor is adversely skewed it may be noted that in the university departments there are specializations with low impact factor journals and other specializations with very high impact factor journals but the teachers researchers of different specializations in the departments compete with each other for promotion in this milieu the researchers with an unfortunate specialization wherein the journal impact factor is mingy or adversely skewed would receive injustice is plainly predetermined therefore a measure such as the h index which quantifies the quality as well as productivity of an individual author scholar would be more appropriate than the journal impact factor the h index may be fine tuned and hence the g index or tol's index may be used nevertheless even the h index and the tol's index would not be appropriate to the purpose of inter disciplinary or inter specialization comparisons a more informed and balanced judgment of the expert committee for selection appointment and promotion purposes will continue to be extremely important

this book deals with methods to evaluate scientific productivity in the book statistical methods deterministic and stochastic models and numerous indexes are discussed that will help the reader to understand the nonlinear science dynamics and to be able to develop or construct systems for appropriate evaluation of research productivity and management of research groups and organizations the dynamics of science structures and systems is complex and the evaluation of research productivity requires a combination of qualitative and quantitative methods and measures the book has three parts the first part is devoted to mathematical models describing the importance of science for economic growth and systems for the evaluation of research organizations of different size the second part contains descriptions and discussions of numerous indexes for the evaluation of the productivity of researchers and groups of researchers of different size up to the comparison of research productivities of research communities of nations part three contains discussions of non gaussian laws connected to scientific productivity and presents various deterministic and stochastic models of science dynamics and research productivity the book shows that many famous fat tail distributions as well as many deterministic and stochastic models and processes which are well known from physics theory of extreme events or population dynamics occur also in the description of dynamics of scientific systems and in the description of the characteristics of research productivity this is not a surprise as scientific systems are nonlinear open and dissipative

encyclopedia of forensic and legal medicine volumes 1-4 second edition is a pioneering four volume encyclopedia compiled by an international team of forensic specialists who explore the relationship between law medicine and science in the study of forensics this important work includes over three hundred state of the art chapters with articles covering crime solving techniques such as autopsies ballistics fingerprinting hair and fiber analysis and the sophisticated procedures associated with terrorism investigations forensic chemistry dna and immunoassays available online and in four printed volumes the encyclopedia is an essential reference for any practitioner in a forensic medical healthcare legal judicial or investigative field looking for easily accessible and authoritative overviews on a wide range of topics chapters have been arranged in alphabetical order and are written in a clear and concise manner with definitions provided in the case of obscure terms and information supplemented with pictures tables and diagrams each topic includes cross referencing to related articles and case studies where further explanation is required along with references to external sources for further reading brings together all appropriate aspects of forensic medicine and legal medicine contains color figures sample forms and other materials that the reader can adapt for their own practice also available in an on line version which provides numerous additional reference and research tools additional multimedia and powerful search functions each topic includes cross referencing to related articles and case studies where further explanation is required along with references to external sources for further reading

margaret cargill's background as a linguist and research communications educator and patrick o connor's experience as both research scientist and educator synergize to improve both the science and art of scientific writing if the authors goal is to give scientists the tools to write and publish compelling well documented clear narratives that convey their work honestly and in proper context they have succeeded admirably veterinary pathology july 2009 the book is clearly written has a logical step by step structure is easy to read and contains a lot of sensible advice about how to get scientific work published in international journals the book is a most useful addition to the literature covering scientific writing aquaculture international april 2009 writing scientific research articles strategy and steps guides authors in how to write as well as what to write to improve their chances of having their articles accepted for publication in international peer reviewed journals the book is designed for scientists who use english as a first or an additional language for research students and those who teach them paper writing skills and for early career researchers wanting to hone their skills as authors and mentors it provides clear processes for selecting target journals and writing each section of a manuscript starting with the results the stepwise learning process uses practical exercises to develop writing and data presentation skills through analysis of well written example papers strategies are presented for responding to referee comments as well as ideas for developing discipline specific english language skills for manuscript writing the book is designed for use by individuals or in a class setting visit the companion site at writerresearch.com.au for more information
