this volume explains how sonography is now used to explore all aspects of ovarian structure
 physiology and disease the ovary is perhaps the most active organ in the female body and as
 such is particularly complex in its embryology histology and steroidogenesis it is derived from a
 range of tissue types and represents the site of origin of a larger variety of primary and
 secondary cancers than any other organ because of this complexity the use of diagnostic
 ultrasound is becoming increasingly important not only in expanding the understanding of the
 ovary but in enhancing the potential for early diagnosis of ovarian tumours

includes section recent book acquisitions varies recent united states publications formerly
 published separately by the u s army medical library

the book presents a detailed description of brief existential psychotherapy bep based on an
 articulated model integrating knowledge from existential psychotherapy psychobiology of human
 stress mind body techniques and principles of positive psychiatry and psychology bep is
 conducted according to a pragmatic method centered on the view of one's existence analysis
 and response to critical life stress events designing a route of acceptance and search for
 meaning in life bep does not substitute other psychotherapies or their indications it is born for

the short term treatment of crises after severe life stress events such as deaths of loved ones losses divorce retirement personal or collective emotional traumas major violations of law and detention in jail with a particular emphasis on severe somatic diseases cancer myocardial infarction stroke degenerative diseases and other subacute or chronic conditions that change life's perspective the volume presents a methodology of bep based on traditional clinical psychopathology with a first step of medical and psychopathological assessment establishing a categorical and a dimensional diagnosis then subsequent steps are provided in a brief psychotherapy course with a more common format of 12 20 sessions 1hr duration the issues and aims of treatment are transversal across different psychiatric diagnoses meaning the intervention follows similar activity lines independently from the specific categorical diagnosis the intervention is dedicated to people with existential suffering without psychopathological diagnosis too medical therapy and psychopharmacological treatment are given according to patient needs there is no preclusion toward the integration between psychotherapy and psychopharmacotherapy as well as other techniques with evidence of efficacy moreover in some cases appropriate psychopharmacotherapy consents to psychotherapy impossible otherwise this volume will be an invaluable tool for psychotherapists psychologists psychiatrists counselors social workers and other medical professionals

some vols include special issues covering the proceedings of the congresses of the european society of cardiovascular surgery or the international cardiovascular society
