il testo in seconda edizione riveduta e ampliata riassume lo stato dell'arte delle conoscenze sui geopolimeri leganti idraulici e materiali ceramici di tipo alluminosilicatico a bassissimo contenuto di calcio. L'attivazione alcalina porta alla parziale dissoluzione di materie prime sia naturali che scarti industriali che danno origine a paste lavorabili e consolidabili a freddo. La buona stabilità termica e le buone proprietà meccaniche portano i geopolimeri a essere materiali interessanti per diverse applicazioni: matrici per refrattari ed antifiamma, materiali da costruzione e restauro, matrici per l'inertizzazione di rifiuti tossici e radioattivi ecc. Il basso impatto ambientale dovuto alle materie prime e al processo a freddo necessario per il loro ottenimento li rendono ecosostenibili. Il testo si rivolge sia ai tecnologi industriali dei materiali sia ai ricercatori che lavorano nelle università e nei centri di ricerca proponendo una aggiornata numerosità di applicazioni.

includes a free cd containing the full contents of the book. The rammed earth technique in all its variants is widespread all over the world. This enormously prevalent building technique harbours an important richness of varieties both in application and in materials used. Interventions on historical rammed earth buildings have also been carried out in all the geographical areas where these structures are found. This historical heritage has undergone diverse forms of reconstruction, conservation, repair, substitution and/or structural consolidation. The different criteria applied require different techniques, materials or forms of intervention. The results of the interventions have also been manifold both in terms of the impact on the building and the technical and material durability. With a view to these issues, this book deals with rammed earth architecture and its restoration and in a more general sense with the construction techniques and restoration of all earthen structures. Rammed earth conservation will be a valuable source of information for academics and professionals in the fields of civil engineering, construction and building engineering and architecture.
