of a destroyed civilization by jonathon a perrin the paranormal tunneling through time could visitors from the past the future be here after all by martin ruggles the unexplained vanishing acts tracking the strange disappearances of people animals worldwide by william b stoecker ufos u s forces vs ufos before roswell could forgotten accounts force a look at evidence once considered taboo by frank joseph the unexplained giants in the papers lost details of the senora skeleton finds by james viera hugh newman consciousness church energy what mystic science were the builders practicing by charles shahar the other side the way of st james was it sacred or a cover for the profane by steven sora ancient wisdom quest for a golden age have we been here before by geoffrey ashe the other side the dimensions of inspiration the strange case of victor hugo yet unsolved by john chambers alternative science reality fundamentally speaking what is it anyway by robert m schoch ph d the forbidden archaeologist forbidden archaeology and consciousness by michael a cremo astrology snow white the goblin farout and other denizens of the outer solar system by julie loar publisher s letter the sun a crystal in the making by j douglas kenyon

this volume offers the author s central articles on the medieval and early modern history of cartography for the first time in english translation a first group of essays gives an overview of medieval cartography and illustrates the methods of cartographers another analyzes world maps and travel accounts in relation to mapped spaces a third examines land surveying cartographical practices of exploration and the production of portolan atlases

the volume discusses the world as it was known in the medieval and early modern periods focusing on projects concerned with mapping as a conceptual and artistic practice with visual representations of space and with destinations of real and fictive travel maps were often taken as straightforward objective configurations however they expose deeply subjective frameworks with social political and economic significance travel narratives whether illustrated or not can address similar frameworks whereas travelled space is often adventurous and speaking of hardship strange encounters and danger city portraits tell a tale of civilized life and civic pride the book seeks to address the multiple ways in which maps and travel literature conceive of the world communicate a weltbild depict space and or define knowledge the volume challenges academic boundaries in the study of cartography by exploring the links between mapmaking and artistic practices the contributions discuss individual mapmakers authors of travelogues mapmaking as an artistic practice the relationship between travel literature and mapmaking illustration in travel literature and imagination in depictions of newly explored worlds

this book consists of three volumes the first volume contains introductory accounts of

topological dynamical systems finite state symbolic dynamics distance expanding maps and ergodic theory of metric dynamical systems acting on probability measure spaces including metric entropy theory of kolmogorov and sinai more advanced topics comprise infinite ergodic theory general thermodynamic formalism topological entropy and pressure thermodynamic formalism of distance expanding maps and countable alphabet subshifts of finite type graph directed markov systems conformal expanding repellers and lasota yorke maps are treated in the second volume which also contains a chapter on fractal geometry and its applications to conformal systems multifractal analysis and real analyticity of pressure are also covered the third volume is devoted to the study of dynamics ergodic theory thermodynamic formalism and fractal geometry of rational functions of the riemann sphere

conceptually the volume focuses on the relationship of the three key notions that essentially triggered the inception and subsequent realization of this project to wit language contact grammaticalization and areal grouping fully concentrated on the areal typological and historical dimensions of slavic the volume offers new insights into a number of theoretical issues including language contact grammaticalization mechanisms of borrowing the relationship between areal genetic and typological sampling conservative features versus innovation and socio linguistic aspects of linguistic alliances conceived of both synchronically and diachronically the volume integrates new approaches towards the areal typological profiling of slavic as a member of several linguistic areas within europe including sae the balkan sprachbund and central european groupings s like the danubian or carpathian areas as well as the carpathian balkan linguistic macroarea some of the chapters focus on structural affinities between slavic and other european languages that arose as a result of either grammatical replication or borrowing a special emphasis is placed on contact induced grammaticalization in slavic micro languages

in recent years geographic mental maps have made a comeback into the spotlight of scholarly inquiry in the area of international relations ir particularly foreign policy analysis fpa the book is framed within the mental map research agenda it seeks to contribute and expand the theoretical and empirical development and application of geographic mental maps as an analytical concept for international politics more precisely it presents a theoretical framework for understanding how mental maps are employed in foreign policy decision making and highlights the mechanisms involved in their transformation the theoretical framework presented in this book employs the latest conceptual and theoretical insight from numerous other scientific fields such as social psychology and organizational theory in order to test the theoretical propositions outlined in the initial chapters the book assesses how the carter administration s changing mental maps impacted its middle east policy in other

words the book applies geographic mental maps as an analytical tool to explain the development of the carter doctrine the book is particularly targeted at academics students and professionals involved in the fields of human geography ir political geography and fpa the book will also be of interest to individuals interested in political science more generally while the book has is academic in nature its qualitative and holistic approach is accessible to all readers interested in geography and international politics luis da vinha phd is assistant professor of geography political science at valley city state university
