this book highlights current cannabis research its botany authentication biotechnology in vitro propagation chemistry cannabinoids biosynthesis metabolomics genomics biomass production quality control and pharmacology cannabis sativa l family cannabaceae is one of the oldest sources of fiber food and medicine this plant has been of interest to researchers general public and media not only due to its medicinal properties but also the controversy surrounding its illicit use cannabis has a long history of medicinal use in the middle east and asia being first introduced as a medicine in western europe in the early 19th century due to its numerous natural constituents cannabis is considered a chemically complex species it contains a unique class of terpeno phenolic compounds cannabinoids or phytocannabinoids which have been extensively studied since the discovery of the chemical structure of tetrahydrocannabinol Δ^9 thc commonly known as thc the main constituent responsible for the plant s psychoactive effects an additionally important cannabinoid of current interest is cannabidiol cbd there has been a significant interest in cbd and cbd oil extract of cbd rich cannabis over the last few years because of its reported activity as an antiepileptic agent particularly its potential use in the treatment of intractable epilepsy in children

after arriving from south asia approximately a thousand years ago cannabis quickly spread throughout the african continent european accounts of cannabis in africa often fictionalized and reliant upon racial stereotypes shaped widespread myths about the plant and were used to depict the continent as a cultural backwater and africans as predisposed to drug use these myths continue to influence contemporary thinking about cannabis in the african roots of marijuana chris s duvall corrects common misconceptions while providing an authoritative history of cannabis as it flowed into throughout and out of africa duvall shows how preexisting smoking cultures in africa transformed the plant into a fast acting and easily dosed drug and how it later became linked with global capitalism and the slave trade people often used cannabis to cope with oppressive working conditions under colonialism as a recreational drug and in religious and political movements this expansive look at africa s importance to the development of human knowledge about marijuana will challenge everything readers thought they knew about one of the world s most ubiquitous plants

cannabis sativa is best known as the source of marijuana the world s most widely consumed illicit recreational drug however the plant is also extremely useful as a source of stem fiber edible seed oil and medicinal compounds all of which are undergoing extremely promising research technological applications and business

investment indeed despite its capacity for harm as a recreational drug cannabis has phenomenal potential for providing new products to benefit society and for generating extensive employment and huge profits misguided policies until recently have prevented legitimate research on the beneficial properties of cannabis but there is now an explosion of societal scientific and political support to reappraise and remove some of the barriers to usage unfortunately there is also a corresponding dearth of objective analysis towards redressing the limitation of information cannabis a complete guide is a comprehensive reference summarizing botanical business chemical ecological genetic historical horticultural legal and medical considerations that are critical for the wise advancement and management of cannabis in its various forms this book documents both the risks and benefits of what is indisputably one of the world's most important species the conflicting claims for medicinal virtues and toxicological vices are examined based mainly on the most recent authoritative scientific reviews the attempt is made consistently to reflect majority scientific opinion although many aspects of cannabis are controversial aside from the relevance to specialists the general public should find the presentation attractive because of the huge interest today in marijuana unfortunately society has become so specialized and compartmentalized that most people have limited appreciation of the importance of science to their lives except when a topic like marijuana becomes sensationalized this review of cannabis can serve as a vehicle for public education in the realm of science and technology indeed towards the goal of disseminating the important information in this book to a wide audience the presentation is user friendly concise and well illustrated in the hope that non specialists will find the topics both informative and entertaining

cannabis is a genetically diverse plant that has been commodified for a variety of different purposes by many cultures throughout world history for thousands of years people have used its fiber seed and flowers to make rope and cloth rig ships feed people and livestock concoct medicines and alter states of consciousness until the nineteenth century though most europeans and americans were unaware of drug varieties of cannabis the british encountered them in india and created western style medicines that sold throughout the atlantic world by the 1840s but negative associations with oriental intoxication and degeneracy sullied the plant's reputation as a viable commodity now after decades of transatlantic criminalization policies against cannabis in the twentieth century it is making a comeback in commodifying cannabis bradley j borougerdi traces the tangled histories of its use for fiber medicine and altered states of consciousness across the atlantic world focusing on the dynamic interplay between these three different cultural applications to explain why the plant has transformed so many times throughout history the historical journey spans a vast geographical landscape and includes over three centuries of source material to illuminate the cultural foundations behind the myriad transformations cannabis has endured as a commodity in the atlantic world
