following world war ii the american government and philanthropic foundations fundamentally remade american universities into sites for producing knowledge about the world as a collection of distinct nation states as neoliberal reforms took hold in the 1980s visions of the world made popular within area studies and international studies found themselves challenged by ideas and educational policies that originated in business schools and international financial institutions academics within these institutions reimagined the world instead as a single global market and higher education as a commodity to be bought and sold by the 1990s american universities embraced this language of globalization and globalization eventually became the organizing logic of higher education in making the world global isaac a kamola examines how the relationships among universities the american state philanthropic organizations and international financial institutions created the conditions that made it possible to imagine the world as global examining the center for international studies harvard business school the world bank the social science research council and nyu kamola demonstrates that how we imagine the world is always symptomatic of the material relations within which knowledge is produced

the conventional wisdom on how technology will change the future is wrong mark mills lays out a radically different and optimistic vision for

what's really coming the mainstream forecasts fall into three camps one considers today as the new normal where ordering a ride or food on a smartphone or trading in bitcoins is as good as it's going to get another foresees a dystopian era of widespread digitally driven job and business destruction a third believes that the only technological revolution that matters will be found with renewable energy and electric cars but according to mills a convergence of technologies will instead drive an economic boom over the coming decade one that historians will characterize as the roaring 2020s it will come not from any single big invention but from the confluence of radical advances in three primary technology domains microprocessors materials and machines microprocessors are increasingly embedded in everything materials from which everything is built are emerging with novel almost magical capabilities and machines which make and move all manner of stuff are undergoing a complementary transformation accelerating and enabling all of this is the cloud history's biggest infrastructure which is itself based on the building blocks of next generation microprocessors and artificial intelligence we've seen this pattern before the technological revolution that drove the great economic expansion of the twentieth century can be traced to a similar confluence one that was first visible in the 1920s a new information infrastructure telephony new machines cars and power plants and new materials plastics and pharmaceuticals single inventions don't drive great long cycle booms it always takes convergent revolutions in technology's three core spheres information materials and machines over history that's only happened a few times we have wrung much magic from the technologies that fueled the last long boom but the great convergence now underway will ignite the 2020s and this time unlike any previous historical epoch we have the cloud amplifying everything the next long boom starts now

hartman desjardins business ethics is designed to prepare the student to apply an ethical decision making model not only in this ethics course but throughout her or his business discipline this model teaches students ethical skills vocabulary and tools to apply in everyday business decisions and throughout their business courses the authors speak in a sophisticated yet accessible manner while teaching the fundamentals of business ethics hartman's professional background in law and her teaching experience in business curriculum combined with desjardins background in philosophy results in a broad language ideal for this approach and market the authors goal is to engage the student by focusing on cases and business scenarios that students already find interesting students are then asked to look at the issues from an ethical perspective additionally its focus on aacsb requirements makes it a comprehensive business ethics text for business school courses
